AMENDMENTS

The issue of amendments is announced regularly in the *ICAO Journal* and in the monthly *Supplement to the Catalogue of ICAO Publications and Audio-visual Training Aids*, which holders of this publication should consult. The space below is provided to keep a record of such amendments.

RECORD OF AMENDMENTS AND CORRIGENDA

[illegible][illegible]

(ii)

Foreword

This manual is one of a series of documents prepared in connection with the ICAO universal safety oversight audit programme. It provides standard auditing procedures for the conduct of audits of Contracting States' safety oversight systems. These standard auditing procedures are not Standards forming part of an ICAO Annex in the sense of Articles 37 and 38 of the Convention on International Civil Aviation, but have been developed by the ICAO Safety Oversight Audit Section (SOA) as part of proven industrial management auditing concepts. Standard auditing procedures will ensure that audits are completed consistently and in accordance with a systematic, objective and proven process.

The primary objective of this manual is to assist both ICAO Contracting States and ICAO audit team members by

explaining the standard auditing procedures and audit follow-up actions. Thus, while providing audit team members with standard auditing procedures to follow, it will also benefit States to be audited by ensuring transparency and fairness.

This manual was initially developed in a preliminary version for application to ICAO safety oversight audits commencing in January 1999, in accordance with Resolution A32-11 of the 32nd Session of the ICAO Assembly (22 September to 2 October 1998) and the decision of the ICAO Council to implement the mandatory ICAO universal safety oversight audit programme. The manual has since been improved and amended as more experience was gained and is now published as the first edition under the authority of the Secretary General.

Chapter 1

INTRODUCTION AND DEFINITIONS

1.1 PURPOSE OF THE MANUAL

1.1.1 The ICAO safety oversight audit manual is published primarily to provide the ICAO universal safety oversight audit programme auditors and Contracting States with guidance and information on standard auditing procedures for the conduct of safety oversight audits.

1.1.2 The safety oversight audit manual also communicates the background for the decision by the 32nd Session of the Assembly to establish the ICAO universal safety oversight audit programme, and it provides information and linkages with other ICAO reference documents.

Note.— Hereafter, the programme will be referred to as the “universal safety oversight audit programme (USOAP)” while the unit established to manage the programme is referred to as the “Safety Oversight Audit Section (SOA)”.

1.2 STRUCTURE OF THE MANUAL

1.2.1 The manual contains standard auditing procedures for the conduct of safety oversight audits. Explanatory and guidance material is included where considered necessary for clarity and guidance.

The standard auditing procedures are enclosed in boxes such as this:

1.2.2 More detail and expansion of the standard auditing procedures and explanatory material follow the principal standard auditing procedure statement.

1.3 RELATED MANUALS

1.3.1 The safety oversight audit manual establishes standard auditing procedures for the conduct of ICAO safety oversight audits. In support of the programme, ICAO has also published or will publish related documents providing procedural guidance and training material for auditors. The following documents are produced and maintained by the SOA:

- auditors’ procedures handbook;
- auditors’ training manual; and
- SOA Administration and Organization Handbook.

Note.— The SOA Administration and Organization Handbook is an internal SOA handbook detailing the establishment and function of the SOA.

1.3.2 The USOAP references the Chicago Convention, the Standards and Recommended Practices (SARPs) contained in the Annexes, and the related guidance material presented in a number of ICAO documents. Together, these documents contain the requirements and guidelines that are subject to verification during the safety oversight audit. Although the programme will eventually be expanded to cover other Annexes, the USOAP is initially limited to three disciplines:

- Annex 1 — *Personnel Licensing*;
- Annex 6 — *Operation of Aircraft*; and
- Annex 8 — *Airworthiness of Aircraft*.

Safety-related SARPs associated with these three disciplines are also contained in other Annexes and will be referenced from time to time.

1.3.3 Other important documents referenced in the safety oversight audit programme are as follows:

- Doc 7300 — *Convention on International Civil Aviation*;
- Doc 8335 — *Manual of Procedures for Operations Inspection, Certification and Continued Surveillance*;
- Doc 8984 — *Manual of Civil Aviation Medicine*;
- Doc 9376 — *Preparation of an Operations Manual*;
- Doc 9379 — *Manual of Procedures for the Establishment and Management of a State’s Personnel Licensing System*;
- Doc 9389 — *Manual of Procedures for an Airworthiness Organization*;
- Doc 9642 — *Continuing Airworthiness Manual*; and
- Doc 9734 — *Safety Oversight Manual — Part A — The Establishment and Management of a State’s Safety Oversight System*.

Note.— The ICAO Catalogue of Publications provides a complete list of documents available to States.

Table 1-1. Responsibilities for delivery of a safety oversight audit

ENTITY		RESPONSIBILITIES
Contracting State		<ul style="list-style-type: none"> Establishment of the aviation safety regulatory framework and ongoing safety oversight for all aviation disciplines in the State.
International Civil Aviation Organization (ICAO)	Safety Oversight Audit Section (SOA)	<ul style="list-style-type: none"> Management and delivery of the universal safety oversight audit programme. Development and maintenance of the safety oversight standard auditing procedures. Quality control of the audit process and audit products.
	Air Navigation Bureau Sections (Headquarters)	<ul style="list-style-type: none"> Establishing SARPs and guidance material for safety oversight. Providing ICAO-approved auditors for audit missions, as required. Providing subject matter experts for training activities related to the safety oversight audit programme, as required. Providing the subject matter expertise for the safety oversight audit programme.
	Regional Offices	<ul style="list-style-type: none"> Providing ICAO-approved auditors for audit missions. Following-up implementation of corrective action plans and providing advice to States. Coordinating regional activities related to the safety oversight audit programme.
Regional organizations		<ul style="list-style-type: none"> May be engaged under special agreement to assist States in the provision of safety oversight and participate in regional safety oversight cooperative programmes. May also enter into a cooperative agreement with ICAO on issues related to the safety oversight audit programme.

1.4 SAFETY OVERSIGHT-RELATED ACTIVITIES

Table 1-1 describes activities of the various bodies concerned with the delivery of an ICAO safety oversight audit.

1.5 DEFINITIONS AND AUDIT TERMINOLOGY

1.5.1 When the following terms are used in this manual or other ICAO safety oversight-related manuals, they have the meanings indicated.

Adequate. Fulfilling minimal requirements; satisfactory; acceptable; sufficient.

Assessment. An appraisal of procedures or operations based largely on experience and professional judgment.

Audit. A systematic and objective review of a State's aviation framework to verify compliance with the provisions of the Chicago Convention or national regulations, conformance with or adherence to SARPs, procedures and good aviation safety practices.

Audit activities. Those activities and procedures by which information is obtained to verify that the audited State is in conformance with, or adherence to, applicable SARPs, procedures and good aviation safety practices. Such activities may include, but are not limited to, interviews, observations, inspections and the review of files and documents.

Audit finding. The determination with respect to the compliance with the provisions of the Chicago

Convention or national regulations, conformance with or adherence to SARPs, procedures and good aviation safety practices.

Audit follow-up. An audit of a Contracting State to determine progress in implementing recommendations or the corrective action plan which resulted from an ICAO safety oversight audit, and to include supplementary findings and recommendations if made incidental to the audit follow-up.

Audit preparation briefing for team members. A pre-audit briefing provided to team members by the audit team leader, the purpose of which is to provide information and instructions, as appropriate, directly related to the specific State audit to be conducted.

Audit report. A standardized means of reporting the audit findings to designated authorities.

Audit team leader. The individual designated by the Chief, Safety Oversight Audit Section (C/SOA) to be responsible for the conduct of an audit, including the consolidation and completion of the audit interim report.

Audited State. The ICAO Contracting State that is the subject of a safety oversight audit.

Certification. The process of determining competence, qualification, or quality on which an aviation document is based.

Conformance. The state of meeting the requirements of an ICAO Standard.

Corrective action plan. An action plan submitted to ICAO by an audited Contracting State, detailing the action the Contracting State proposes to take, on the basis of recommendations made by an ICAO audit team. Implementation of the corrective action plan should bring the audited State into full compliance with the provisions of the Chicago Convention or national regulations, conformance with or adherence to SARPs, procedures and good aviation safety practices.

Inspection. The basic activity of an audit, which involves examination of the specific characteristics of the safety oversight programme of the Contracting State.

Non-adherence. A deficiency in characteristic, documentation or procedure with respect to a recommended practice, procedure, guideline or good aviation safety practice.

Non-compliance. A deficiency in characteristic, documentation or procedure with respect to provisions of the Chicago Convention or a national regulation.

Non-conformance. A deficiency in characteristic, documentation or procedure with respect to an ICAO Standard.

Objective evidence. Information which can be proved to be true, based on facts obtained through independent observation, measurement, test or other means.

Post-audit meeting. A meeting of the ICAO audit team and the representatives of the audited State at the end of the audit, the purpose of which is to provide the State authorities with a brief on audit findings and proposed recommendations to enable the State to start working on its corrective action plan.

Pre-audit meeting. A meeting of the ICAO audit team and the representatives of the State to be audited before the commencement of the audit, the purpose of which is to provide the State authorities with information on the audit process and the scope of the audit.

Procedure or process. A series of steps followed in a methodical manner to complete an activity (what shall be done and by whom; when, where and how it shall be completed; what materials, equipment, and documentation shall be used, and how it shall be controlled).

Protocol. A document that organizes audit procedures into a general sequence of audit steps and describes the steps in terms of specified standards or recommended practices to be verified.

Safety. A condition in which the risk of harm or damage is limited to an acceptable level.

Safety oversight pre-audit questionnaire. A questionnaire designed to collect specific information in advance of the audit to assist in audit planning and conduct.

Scope. The areas of a State's aviation system to be audited.

Standard auditing procedures. Established criteria governing the conduct of an audit, aimed at measuring a Contracting State's level of compliance, conformance or adherence.

Verification. The independent review, inspection, examination, measurement, testing, checking, observation and monitoring to establish and document that products, processes, practices, services and documents conform to specified standards. This includes evaluating the effectiveness of management systems.

Chapter 2

THE ICAO UNIVERSAL SAFETY OVERSIGHT AUDIT PROGRAMME

2.1 SAFETY OVERSIGHT BACKGROUND

2.1.1 On 7 June 1995, the ICAO Council approved the ICAO safety oversight programme as well as the related mechanism for financial and technical contributions. The programme was subsequently endorsed by the 31st Session of the Assembly and became operational in March of 1996. The programme was a voluntary assessment of a State's implementation of the ICAO Standards and Recommended Practices (SARPs), and reports were provided only to the assessed States.

2.1.2 During the first two years of operation, the ICAO safety oversight assessment programme detected numerous deficiencies in the establishment of effective safety oversight programmes in Contracting States.

2.2 DGCA CONFERENCE

2.2.1 The critical need for increased attention to global aviation safety led to the convening of a conference of Directors General of Civil Aviation (DGCA) in November 1997. These civil aviation leaders from around the world gathered to address the problem and to develop a new strategy for enhancing the global capacity for safety oversight.

2.2.2 The DGCA Conference resulted in unanimous agreement to change the mandate of the safety oversight programme. The Conference made a total of 38 recommendations, the most significant being:

- a) that regular, mandatory, systematic and harmonized safety audits be introduced, to include all Contracting States and to be carried out by ICAO;
- b) that greater transparency and increased disclosure be implemented;
- c) that the programme be expanded to include other technical fields at the appropriate time; and
- d) that the ICAO Council ensure the allocation of adequate resources.

2.3 COUNCIL APPROVAL

2.3.1 Following the 1997 DGCA Conference, the ICAO Council completed a preliminary review of the conclusions and recommendations and instructed the Secretary General to prepare and submit to Council an action plan addressing the 38 recommendations of the DGCA Conference. An action plan was subsequently considered by the Council, and the Secretary General was requested to complete a plan of action containing resource estimates and schedule.

2.3.2 On 6 May 1998, the Council reviewed all material and approved the establishment of an ICAO universal safety oversight audit programme.

2.4 ASSEMBLY APPROVAL

2.4.1 The 32nd Session of the ICAO Assembly adopted Resolution A32-11 — 'Establishment of an ICAO universal safety oversight audit programme', which:

- a) resolved that the universal safety oversight audit program be established, comprising regular, mandatory, systematic and harmonized safety audits, to be carried out by ICAO; that such universal safety oversight audit programme shall apply to all Contracting States; and that greater transparency and increased disclosure be implemented in the release of audit results;
- b) directed the Council to bring into effect, from 1 January 1999, a universal safety oversight audit programme accordingly, including a systematic reporting and monitoring mechanism on the implementation of safety-related Standards and Recommended Practices;
- c) urged all Contracting States to agree to audits to be carried out upon ICAO's initiative, but always with the audited State's consent, by signing a bilateral memorandum of understanding with the Organization, as the principle of sovereignty should be fully respected;

- d) directed the Council to apply the resources made available in order to implement the ICAO universal safety oversight audit programme; and
 - e) requested the Council to report to the next ordinary Session of the Assembly on the implementation of the programme, and to present to the Session proposals for funding the programme on a long-term basis.
-

Chapter 3

AUDIT POLICY

3.1 PROGRAMME OBJECTIVE

The objective of the universal safety oversight audit programme is to promote global aviation safety through auditing Contracting States, on a regular basis, to determine the status of States' implementation of safety oversight and relevant ICAO Standards and Recommended Practices, associated procedures, guidance material and safety related practices.

ICAO Assembly Resolution A32-11, dated 1 October 1998, forms the basis of the ICAO policy and objectives for conducting safety oversight audits.

3.2 SAFETY OVERSIGHT AUDIT OBJECTIVES

The primary objectives of an ICAO safety oversight audit are to:

- determine the degree of conformance of the State in implementing ICAO Standards;
- observe and assess the State's adherence to ICAO Recommended Practices, associated procedures, guidance material and safety related practices;
- determine the effectiveness of a State's implementation of a safety oversight system, through the establishment of legislation, regulations, safety authority and inspection and auditing capability;
- provide advice to Contracting States to improve their safety oversight capability.

In addition to the primary objectives of the safety oversight audit described in the box above, global aviation safety will benefit from the disclosure of audit information through:

- a) the transmittal of an audit summary report to all Contracting States, and
- b) the publication in Annex Supplements of differences to SARPs,

which will provide sufficient safety information to permit Contracting States to make decisions with respect to their responsibilities for safety oversight.

3.3 AUTHORITY FOR THE AUDIT PROGRAMME

3.3.1 The 32nd Session of the ICAO Assembly approved the ICAO universal safety oversight audit programme, thus giving authority to the Council to establish the programme.

3.3.2 The Chief of the Safety Oversight Audit Section (C/SOA) is responsible for the management of the safety oversight programme and for the conduct of safety oversight audits in accordance in the SOAM.

3.3.3 C/SOA is therefore the convening authority for audits approved by the Secretary General in accordance with the annual audit and follow-up audit plan. C/SOA is authorized to plan the conduct of audits, to select audit team members and to assign the audit team leader to specific audits in accordance with the qualification standards established in the SOAM.

3.4 PRINCIPLES

ICAO safety oversight audit programme principles

- sovereignty
- universality
- transparency and disclosure
- timeliness
- all-inclusiveness
- consistency and objectivity
- fairness
- quality

3.4.1 Sovereignty

Every State has complete and exclusive sovereignty over the airspace of its territory. Accordingly, ICAO fully respects a sovereign State's responsibility and authority for safety

oversight, including its decision-making powers with respect to implementing corrective actions related to audit findings.

3.4.2 Universality

Assembly Resolution A32-11 explicitly requires ICAO to conduct regular and mandatory safety oversight audits on all Contracting States. Safety oversight audits will therefore be conducted on all Contracting States in accordance with an audit programme established by ICAO and agreed upon by the States.

3.4.3 Transparency and disclosure

The Assembly Resolution and the Council decisions based on the Recommendation of the 1997 DGCA Conference also call for transparency and increased disclosure. As a result, an audit summary report of each completed audit, containing sufficient information so that other Contracting States can form an opinion as to the safety oversight status of the audited State, will be made available to all Contracting States. The audit summary report shall include an abstract of the overall findings and recommendations of the safety oversight audit team, of the actions proposed by the audited State to remedy deficiencies, if any, and of the progress made by the audited State in the implementation of the corrective action plan.

3.4.4 Timeliness

Results of the audits will be produced and submitted on a timely basis in accordance with a predetermined schedule for the preparation and submission of audit reports.

3.4.5 All-inclusiveness

The scope of the ICAO universal safety oversight audit programme is currently limited to Annexes 1, 6 and 8. It is expected to expand at appropriate times to include other Annexes, in order to ensure implementation of SARPs in all technical fields in ICAO Contracting States' civil aviation systems.

3.4.6 Systematic, consistent and objective

ICAO safety oversight audits will be conducted in a consistent and objective manner. Standardization and uniformity in the scope, depth and quality of audits will be assured through an initial and refresher training of all auditors, the provision of guidance material, and the

implementation of an audit quality control system within the Safety Oversight Audit Section.

3.4.7 Fairness

Audits are to be conducted in a manner such that Contracting States are given every opportunity to monitor, comment on, and respond to, the audit process, but to do so within the established time frame.

3.4.8 Quality

Safety oversight audits will be conducted by appropriately trained and qualified auditors and in accordance with widely recognized auditing concepts.

3.5 CONFIDENTIALITY

Safety oversight audit reports (interim and final) are confidential and will only be available to the audited State and the Regional Director of the accredited ICAO Regional Office. An audit summary report containing an abstract of the findings and recommendations and of the proposed State corrective action plan and action implemented will, however, be distributed to all Contracting States (see also 3.4.3 – Transparency and disclosure).

3.5.1 Among other things, this manual explains standard auditing procedures for conducting an ICAO safety oversight audit and the preparation and completion of audit reports. Policy and instruction for the preparation and distribution of the non-confidential audit summary report are contained in Chapter 6, Section 6.6 of this manual. All other reports and material collected during an audit will remain confidential between the audited State, the accredited ICAO Regional Office and ICAO Headquarters, as appropriate, unless explicitly authorized by the audited State. All confidential material relating to an ICAO safety oversight audit shall be stored in a secured place.

3.5.2 Information regarding a refusal or deferral by a Contracting State to undergo a safety oversight audit will not be treated as confidential information.

3.6 ANNUAL AUDIT AND AUDIT FOLLOW-UP PLAN

The SOA shall prepare an annual audit and audit follow-up plan, which shall be made available to all Contracting States. The annual audit plan will be updated and distributed bi-annually.

3.6.1 Contracting States scheduled for an audit or audit follow-up should advise ICAO of their agreement to the audit or audit follow-up plan as soon as possible, and in any event at least four months before the commencement of the audit or audit follow-up.

3.7 DEFERRALS

States are urged to cooperate with ICAO and accept the intended audit period indicated in the audit and audit follow-up plan unless they have a compelling reason not to do so. Should a State be unable to accept an ICAO audit or audit follow-up mission during the proposed period, it should notify ICAO of the situation not less than two months prior to the scheduled start of the audit or follow-up audit.

3.7.1 Audit deferrals are strongly discouraged as they have a domino effect on the audit plan and cause considerable difficulty for ICAO and other Contracting States affected by the schedule change.

3.7.2 A request for deferral should be addressed to the Secretary General and should be signed by a senior aviation authority of the State, clearly stating the compelling reason for not accepting the audit or audit follow-up as planned.

3.8 LANGUAGE OF THE AUDIT

The State to be audited shall indicate the preferred ICAO language to be used for the conduct of the safety oversight audit.

As much as possible, the audit shall be conducted and the audit reports shall be written in the ICAO language preferred by the State. If the audit has to be made in a language other than that selected by the State, the audit reports will be translated and made available to the State in accordance with the timeline specified in the MOU.

ICAO will ensure that at least one of the audit team members will have command of the ICAO language chosen by the State for the audit.

3.9 QUALITY ASSURANCE

The SOA will establish and maintain a quality assurance programme to ensure confidence in the systematic and objective delivery of all aspects of the audits, including their planning, conduct, reporting and follow-up.

3.9.1 An internal quality assurance system has been established and managed under the leadership of C/SOA. An "SOA Administration and Organization Handbook" describing the internal and external quality assurance process has been developed by SOA. This handbook describes members, responsibilities, management review processes and other requirements enabling Contracting States to have a high degree of confidence in the process.

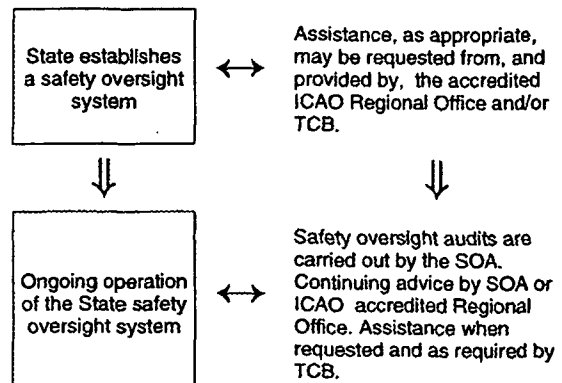

3.9.2 ICAO may, in due course, establish a quality assurance programme external to the SOA.

3.10 THE ROLE OF ICAO REGIONAL OFFICES

ICAO Regional Offices have the primary responsibility for monitoring implementation of States' corrective action plans following a safety oversight audit and for providing advice to Contracting States whenever necessary.

The Regional Officers, Safety Oversight, will participate in safety oversight audits and other USOAP activities as assigned and will also coordinate regional activities related to safety oversight issues.

3.10.1 Contracting States have a responsibility, under the Chicago Convention, for safety oversight of their respective aviation industry, airspace and infrastructure. The USOAP is established to assess conformance with, or adherence to, ICAO SARPs, procedures, guidance material and safety-related practices. ICAO also has a mandate to assist States, where possible, in the establishment of effective State safety oversight systems. The ICAO Technical Cooperation Bureau (TCB) has prime responsibility for providing technical assistance to States as required and when requested. The SOA, through its auditor staff, may provide advice to States. The diagram below depicts actions related to the establishment of a State's safety oversight system and the provision of advice and assistance to States by ICAO.

3.10.2 ICAO Regional Offices must be familiar with the status of safety oversight in States within their respective regions. Regional Officers, Safety Oversight will be trained and approved as ICAO audit team members; this will benefit the programme by ensuring continuing availability of expertise within the Regions.

3.10.3 In addition to participating in audits and follow-up audits, the ICAO Regional Office may also be required to conduct a preliminary review of the State's progress towards the implementation of the corrective action plan.

3.11 THE ROLE OF REGIONAL ORGANIZATIONS

Regional civil aviation organizations, such as the European Civil Aviation Conference (ECAC), the Latin American Civil Aviation Commission (LACAC), and the African Civil Aviation Commission (AFCAC), may enter into a cooperation agreement with ICAO on behalf of their member States. This agreement may include activities such as assistance provided to ICAO in conducting audits and follow-up audits and other safety oversight related activities. ICAO can also enter into agreements with individual States for the long- or short-term secondment of national experts.

3.11.1 Participation by regional civil aviation organizations benefits global aviation safety by enhancing the safety oversight expertise base, which may also be used to improve safety-related activities in the regions or in individual Contracting States, and by facilitating the exchange of safety-related information.

3.11.2 C/SOA may, as required, assign team members from among experts made available to ICAO by Contracting

States or by regional civil aviation organizations in accordance with applicable cooperation agreements. Experts assigned for audit duties with ICAO will be appropriately qualified and approved by C/SOA. Assignment of such experts will be made in coordination with their respective organizations and authorities.

3.12 OBSERVERS

Observers of ICAO safety oversight audits may be permitted with the approval of C/SOA. Observers would generally be audit team members assigned to on-the-job training. However, other personnel may also be allowed to participate as observers if, in the opinion of C/SOA, their participation will benefit the overall safety objective of the programme.

3.12.1 Observers of an audit are personnel other than ICAO-approved auditors, assigned to participate in the audit for training purposes.

3.12.2 In specific audit missions, an interpreter or advisor may be assigned to facilitate communications between the audited State and the audit team and mainly to provide assistance to the safety oversight audit team.

3.12.3 Participation of observers shall be made known to the audited State in the same manner the audit team members are made known to the State and they shall also be included in the list of team members.

3.12.4 On occasion, the audited State may assign an observer or advisor to its team. Such individuals can participate in the audit of the State as "State representatives to the audit".

Chapter 4

AUDIT PROGRAMME MANAGEMENT

This chapter provides information on the establishment and management of the ICAO Safety Oversight Audit Section (SOA), which is responsible for the management of the ICAO universal safety oversight audit programme.

4.1 ICAO SAFETY OVERSIGHT AUDIT SECTION

The ICAO Safety Oversight Audit Section is responsible for the management of the ICAO universal safety oversight audit programme and for all safety oversight related activities in ICAO.

4.1.1 The SOA is a section within the Air Navigation Bureau (ANB), ICAO Headquarters, Montreal. The SOA has its own organizational structure reflecting its most recent establishment as shown in Appendix A.

4.1.2 The present core staff of the section consists of a Chief (C/SOA), a Technical Coordinator (TC/SOA), a Training and Administrative Coordinator (TAC/SOA), two Standards and Procedures Officers and seven administrative support staff. Safety oversight auditors, as required, also form part of the core staff at Headquarters. The responsibilities and duties of the core staff are specified in the SOA Administration and Organization Handbook.

4.1.3 In addition to the core staff at ICAO Headquarters, the SOA has access to the services of the Regional Officers, Safety Oversight based in the seven ICAO Regional Offices. They are full partners in the activities of the SOA and are normally expected to participate in safety oversight audits and audit follow-ups and to assist in the organization of safety oversight seminars and workshops in their regions.

4.1.4 Additional temporary audit team members available to the SOA include experts seconded to the programme by Contracting States either directly or through a regional civil aviation organization. During an ICAO safety oversight audit assignment, such experts are considered ICAO staff members and are bound by the obligations and responsibilities of all international civil servants. Secondment to ICAO could be long-term

(normally up to two years) or short-term (for a single mission or a series of missions). Long-term seconded experts form part of the core staff at Headquarters.

4.2 AUDIT PERSONNEL

All personnel assigned to ICAO safety oversight audit duty are first required to satisfy predetermined qualification criteria and training requirements.

4.2.1 Audit personnel must satisfy certain qualification and experience criteria. Examples of such criteria are that personnel must:

- a) have extensive knowledge of civil air regulations and the regulatory procedures of a civil aviation authority;
- b) have at least five years of recent experience as aviation legal expert, personnel licensing officer, aircraft operations inspector or airworthiness inspector working with a national civil aviation authority or equivalent experience working in international or regional civil aviation organizations, including at least two years of direct experience with aviation regulatory issues or the certification and inspection of both domestic and international air operators;
- c) have, for operations and airworthiness auditors, a minimum of five years of industry experience in an area such as check pilot in air transport operations, supervisor and/or senior inspector in the airworthiness department of an air transport operator or aircraft maintenance organization;
- d) hold or have held, where applicable, an appropriate licence or certificate of competency commensurate with the level of qualification and experience (proof of current licence/certificate held or of licences and certificates previously held may be required);
- e) have adequate knowledge of relevant ICAO SARPs and guidance material (ICAO provides training on the application of relevant related Annexes and guidance material developed by ICAO);

- f) demonstrate motivation and the ability to write clearly and concisely;
- g) have initiative, judgement, tact and the ability to maintain harmonious working relationships in a multicultural environment and appreciation of and sensitivity to cultural differences;
- h) have command of one of the languages of the Organization (Arabic, Chinese, English, French, Russian, Spanish) and a working knowledge of English; and
- i) have the ability to use office automation equipment and contemporary computer software.

4.2.2 It is desirable that audit personnel have managerial skills, related experience and knowledge of an additional ICAO language.

4.3 TRAINING

The SOA conducts safety oversight auditor training from time to time. All auditors are required to satisfactorily complete this training prior to being assigned as audit team members. Training is provided in accordance with the syllabus contained in the Safety Oversight Audit Training Manual.

4.3.1 Training provided to new audit team members will include on-the-job training, which should be successfully completed prior to being approved and assigned as an ICAO safety oversight audit team member.

4.3.2 The SOA is committed to providing regular ongoing training to all active safety oversight audit team members. Such training may be provided at ICAO Headquarters or in any ICAO region, depending on circumstances.

4.4 APPROVAL OF AUDITORS

After successfully completing the safety oversight auditor training course and on-the-job training, auditors must satisfy C/SOA that they have met the requirements, as specified in the Safety Oversight Audit Training Manual, for conducting ICAO safety oversight audits.

The SOA will maintain a current list of safety oversight auditors, which will also contain records of initial and recurrent training and of audits performed by each auditor

approved by C/SOA. Such records will facilitate the assignment of auditors and help determine recurrent training requirements.

4.5 AUDIT TEAMS

Audit teams are assigned by C/SOA. Audit teams generally consist of three team members but this number may be augmented depending on the size and complexity of the State to be audited and when observers and/or advisors are assigned to the team.

4.5.1 Audit teams will consist of an audit team leader and a specialist auditor for each discipline included in the scope of the audit. An audit team leader may also serve as one of the specialist auditors. The number of auditors in a team depends on the scope, size and complexity of the audit. Whenever required, C/SOA may appoint additional team members as auditors, observers, advisors or interpreters.

4.5.2 Audit teams will be assigned for each audit and follow-up audit, and although the same auditors may be involved in multi-State audit missions, the team structure may change for each audit.

4.5.3 Prior to the commencement of an audit, the State will be advised of the audit team's composition.

4.6 AUDIT TEAM LEADER

C/SOA will appoint an audit team leader for each audit. The audit team leader assumes responsibility for the conduct and reporting of the audit in accordance with guidance and instructions provided by ICAO, including those found in this manual.

4.6.1 C/SOA will take into consideration qualifications, experience and relations with other team members when choosing an audit team leader.

4.6.2 In addition to specific tasks assigned by C/SOA, an audit team leader's responsibilities may include:

- a) assisting the SOA in the preparation of the State-specific safety oversight audit plan;
- b) coordinating with the Technical Coordinator, the Training and Administrative Coordinator and the Standards and Procedures Officer in matters related to the conduct of the audit;

- c) holding an audit preparation briefing for team members prior to the conduct of the audit;
- d) conducting pre- and post-audit meetings with the State civil aviation authorities;
- e) providing leadership and guidance, as necessary, to audit team members;
- f) coordinating the development of the audit report and submitting it to SOA;
- g) preparing the audit team leader's mission report; and
- h) liaising with Regional Offices or regional civil aviation organizations when required by C/SOA or the Technical Coordinator.

4.7 AUDIT TEAM MEMBERS

Audit team members are assigned to specific audits by C/SOA and are responsible to the audit team leader. Audit team members are selected from the list of approved safety oversight auditors available to C/SOA.

4.7.1 Audit team members are required to be free from bias and influences that could affect their objectivity

as ICAO audit team members. Audit team members must maintain independence from the audited State. They must always remain within the scope of the audit, display integrity, exercise objectivity and remain alert to any indication of evidence that may influence the audit result.

4.7.2 In addition to the specific tasks assigned by C/SOA or the audit team leader, the audit team member's responsibilities may include:

- a) communicating and clarifying audit requirements;
- b) planning and carrying out assigned responsibilities effectively and efficiently;
- c) documenting all findings and observations;
- d) developing a report of findings and recommendations;
- e) assessing the effectiveness of the corrective action plan submitted by an audited State;
- f) submitting to the SOA, through the audit team leader, all confidential documents and notes pertaining to an audit; and
- g) cooperating with and assisting the audit team leader at all times during the preparation, conduct and completion of the audit process.

Chapter 5

AUDIT PROCEDURES

5.1 AUDIT OVERVIEW

5.1.1 This chapter describes the standard auditing procedures and significant elements of the procedures applied in the ICAO universal safety oversight audit programme. Detailed organizational procedures are provided in the auditors' procedures handbook.

5.1.2 The establishment of standard auditing procedures does not eliminate the need for skilled and experienced judgment by ICAO safety oversight auditors. State-specific issues and the structure of the State aviation industry and civil aviation authority will necessarily shape the scope of the safety audits and the manner of proceeding. This serves as an example of the need for standardization in a qualitative sense, as professional judgment based on proper training and experience must be a standard requirement.

5.1.3 The timeline (cycle of the safety oversight audit process) for ICAO and audited State activities following an audit is illustrated in Figures 5-1(a) and 5-1(b).

5.2 NOTIFICATION

ICAO should inform States of the scheduled audit period, normally at least six months prior to the commencement of an audit or an audit follow-up. States should confirm agreement with the scheduled audit period and return a signed Memorandum of Understanding to ICAO, as soon as possible and in any case at least four months prior to the commencement of the audit.

5.2.1 An ICAO Contracting State is formally notified of an audit by means of a letter signed by the Secretary General. This formal notification follows the annual audit and audit follow-up plan forwarded to all Contracting States twice a year.

5.2.2 A State-specific Memorandum of Understanding (MOU) signed by the Secretary General will be attached to the letter as well as the "Summary of State's civil aviation activities" questionnaire and other pertinent information regarding the audit to be conducted. The letter

will also contain a request for the MOU to be countersigned by the appropriate authority, and for the "Summary of State's civil aviation activities" questionnaire to be returned to ICAO within the indicated time period. The accredited ICAO Regional Office will be informed of the formal request for audit and will be requested to follow up the initiative.

5.3 ANNUAL AUDIT AND AUDIT FOLLOW-UP PLAN

An annual audit and audit follow-up plan will be prepared by the ICAO Safety Oversight Audit Section and forwarded to all Contracting States as an attachment to a State Letter from the Secretary General.

The ICAO annual audit and audit follow-up plan consists of a fixed programme of audits and audit follow-ups for a period of twelve months. The annual audit and audit follow-up plan is a firm plan and States are urged to cooperate with ICAO to ensure its implementation.

5.4 MEMORANDUM OF UNDERSTANDING (MOU)

Prior to the commencement of an audit, the State should agree to the contents of the MOU signed by the ICAO Secretary General and forwarded to the State as an attachment to the formal confirmation and should return a countersigned copy of the MOU to ICAO.

5.4.1 The MOU will confirm that the safety oversight audit will be conducted in accordance with the terms specified in the MOU and on the basis of the criteria contained in this manual. No safety oversight audit will be undertaken unless an appropriately signed MOU has been returned to ICAO.

5.4.3 A copy of a generic MOU approved by the ICAO Council is provided in Appendix B to this manual.

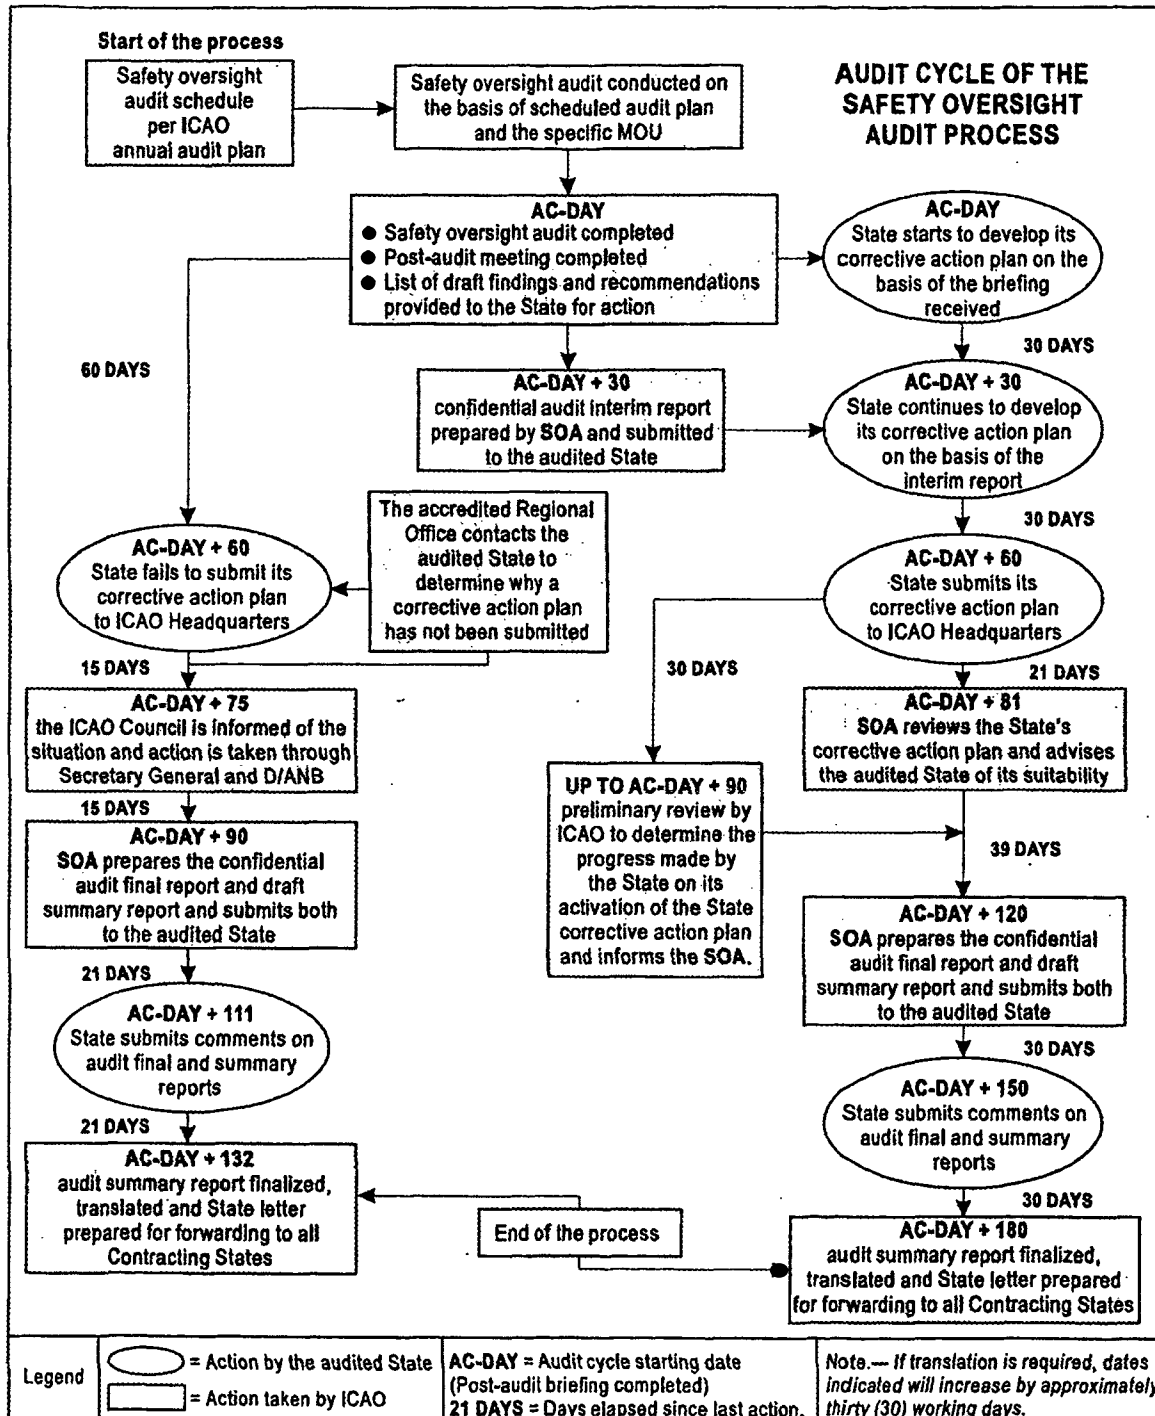

Figure 5-1(a). Audit cycle of the safety oversight audit process

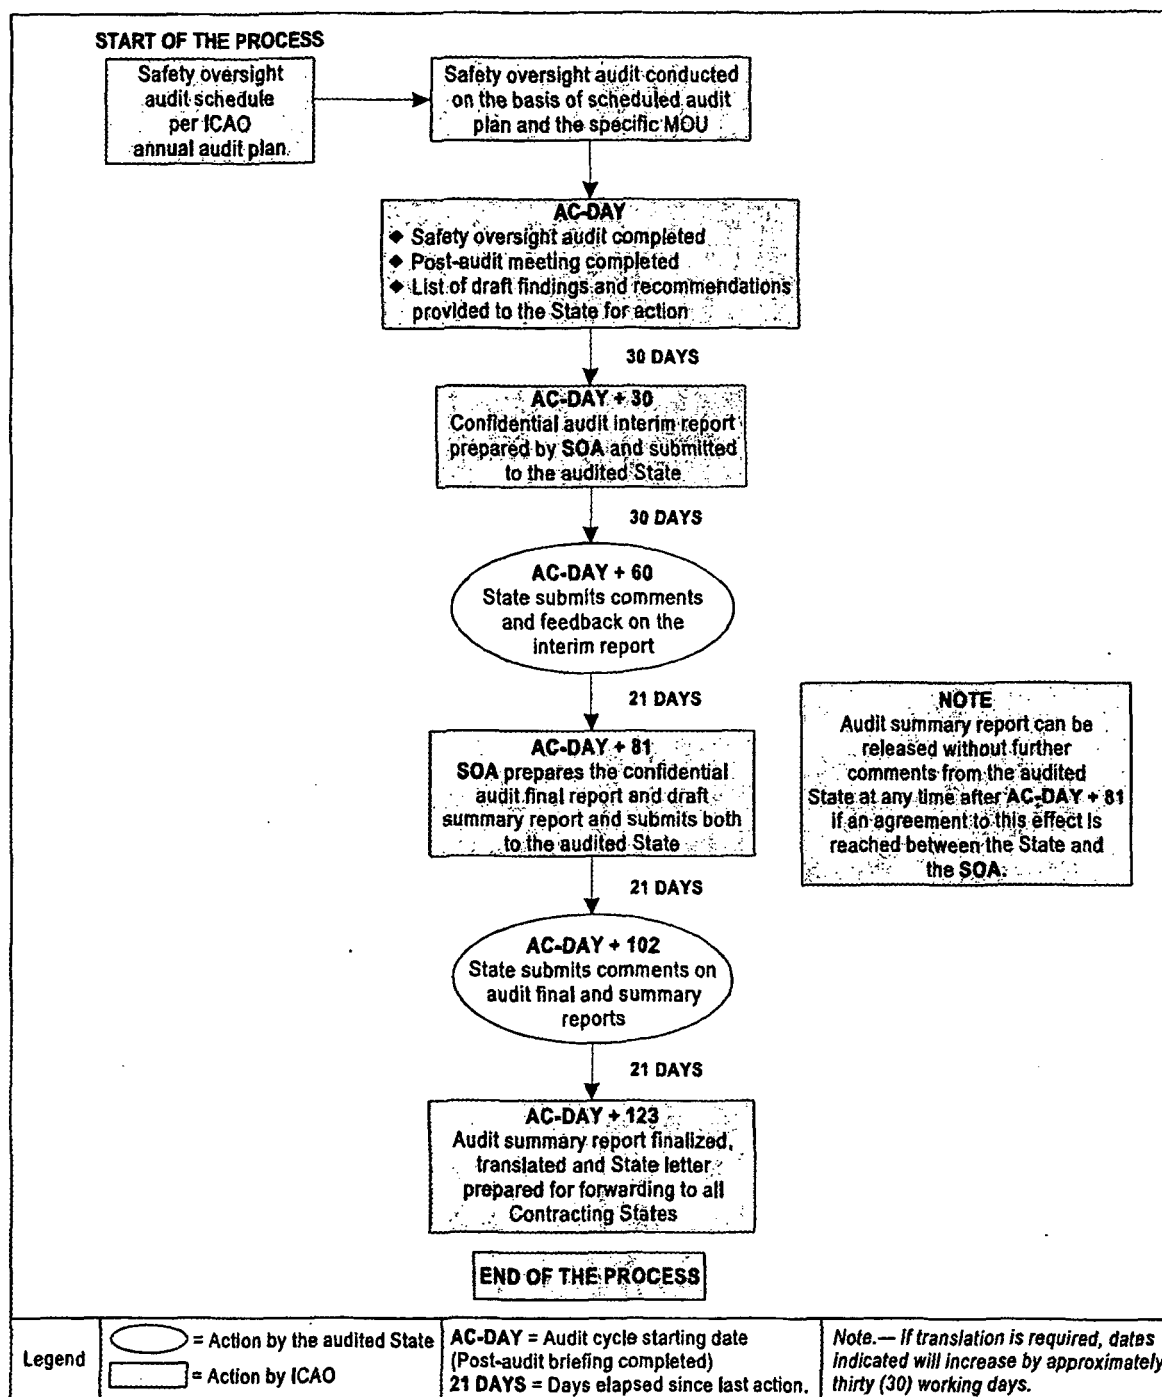

Figure 5-1(b). Audit cycle for safety oversight audit not requiring action by an audited State

5.5 ASSIGNMENT OF AN AUDIT TEAM

An audit team leader and qualified team members will be assigned by C/SOA prior to the commencement of an audit.

5.5.1 C/SOA assigns the team members and appoints the audit team leader. Auditors will be selected from among the appropriately qualified and approved safety oversight auditors already registered with SOA. At least one member of the audit team will have command of the ICAO language chosen by the Contracting State.

5.5.2 Audit team members will normally be assigned at least four months prior to the commencement of the audit. Although the team may work together for a mission consisting of more than one audit, each audit must have a specific team named.

5.5.3 As far as practicable, the safety oversight audit team will comprise auditors of different nationalities.

5.5.4 States to be audited will be advised of the names of the audit team members prior to the commencement of the audit.

5.6 REVIEW OF DOCUMENTS AND RECORDS

Prior to the commencement of an audit, the audit team leader and, if possible, assigned team members, will review the information on the status of implementation of SARPs and the list of differences provided by the State to be audited, on the basis of the pre-audit questionnaire. Previous audit or assessment results and differences filed by the State and recorded in Annex Supplements will also be reviewed at this time.

5.6.1 The State shall complete and return, at least two months prior to the commencement of the audit, the safety oversight pre-audit questionnaire (attached to the formal audit confirmation letter), along with a status of implementation of SARPs and a list of differences identified in the process of completing the pre-audit questionnaire. The State is also required to forward documentation such as its primary aviation legislation, personnel licensing regulations, aircraft operating and airworthiness regulations and the State's summary of civil aviation activities in preparation for the conduct of the audit.

5.6.2 If available, the State's aviation legislation should be provided in one of the ICAO languages and

preferably in English, to facilitate better understanding by the audit team.

5.6.3 The audit team leader will obtain information regarding differences filed by the State and recorded in Annex Supplements. This information together with the list of differences identified during the review of the safety oversight pre-audit questionnaire is to be confirmed or updated during the course of the audit.

5.7 STATE-SPECIFIC SAFETY OVERSIGHT AUDIT PLAN

A State-specific safety oversight audit plan will be developed and provided to the audited State prior to the commencement of the audit.

5.7.1 The purpose of the State-specific safety oversight audit plan is to outline the sequential process of the audit and provide the State with the necessary information. Last-minute modifications to the State-specific safety oversight audit plan are not overruled; should they be necessary, the audit team leader will inform the State authorities during the pre-audit meeting.

5.7.2 The audit team leader for the specific audit will develop a State-specific safety oversight audit plan in coordination with the Technical or Training and Administrative Coordinator of the SOA, as appropriate. The specific safety oversight audit plan will include the following information:

- a) dates of the safety oversight audit;
- b) objectives of the audit;
- c) scheduled dates for pre- and post-audit meetings;
- d) identification of the State CAA's key personnel, including a contact person designated by the State;
- e) scope of the audit to be conducted and audit areas to be considered;
- f) identification of documents necessary to conduct the audit;
- g) tentative work programme of audit activities, including visits to CAA regional offices (if any), air transport operators, manufacturing companies, maintenance organizations, training schools and institutes, etc.;
- h) travel and administration plans (entry visas, security clearances, health requirements, etc.), as well as the travel schedules of audit members;

- i) the language to be used for the audit, the audit preparation briefing material for team members and the audit mission package;
 - j) identification of priority issues brought to the attention of SOA from reviewing material provided and other documents available to ICAO or information received on the status of aviation activities in the State;
 - k) team members' assignments and responsibilities; and
 - l) contents and scope of the audit team leader's mission report.
- g) visits to CAA regional offices, air transport operators, manufacturing companies, maintenance organizations, training schools and institutes, etc.;
 - h) time, date and place for the post-audit meeting and any interim meetings of the audit team and the State's senior management;
 - i) clarification of any unclear details of the safety oversight audit plan; and
 - j) procedures for documenting audit findings.
- 5.8.3 The audited State should be prepared to assist the safety oversight audit team by providing:

5.7.3 The tentative work programme will be provided to and discussed with the assigned audit team members during the audit preparation briefing prior to the commencement of the audit.

5.8 PRE-AUDIT MEETING

The audit team leader will conduct a pre-audit meeting on the first day of the audit. The purpose of the meeting is to brief the State civil aviation authority on the audit programme, process and scope of the audit and to confirm audit schedule arrangements.

5.8.1 The pre-audit meeting will be scheduled in advance and included in the tentative work programme.

5.8.2 The pre-audit meeting may be jointly chaired by the ICAO audit team leader and the senior executive of the audited State, who may also wish to provide briefing and information to the ICAO team. The agenda should include at least the following items:

- a) introduction of members of the audit team and CAA officials;
- b) background history of the ICAO universal safety oversight audit programme;
- c) review of the tentative work programme, including the objectives and scope;
- d) a short summary of the methods and procedures to be used to conduct the audit;
- e) official communication links between the audit team members and the State officials;
- f) facilities and administrative arrangements;

- a) working space, preferably with privacy;
- b) access to a photocopier and facsimile machine;
- c) access to facilities (i.e. building passes);
- d) access to electronic communication media such as the Internet and e-mail, if available;
- e) access to CAA files and records or those of any other relevant entity responsible for safety regulations;
- f) access to selected personnel for interviews; and
- g) access to knowledgeable aviation advisers and liaison officers.

5.9 ON-SITE AUDIT

This on-site gathering of evidence will be systematic and objective and all audit findings will be recorded on standardized forms, with reference made to the relevant ICAO Standard Recommended Practice or guidance material for which the finding was made.

5.9.1 Evidence will be collected through interviews, reviewing documents, and observing activities and conditions in the State's aviation system. Non-compliances, non-conformances and non-adherences will be recorded with a clear indication of how and why the audit finding was made. Absence of evidence will normally be reflected as a non-conformance or non-adherence.

5.9.2 After audit activities are completed, the audit team will review all audit findings to confirm or reconfirm which of the findings are non-compliances, non-conformances or non-adherences. The audit team will then ensure

that the findings are documented in a clear, concise manner and are supported by evidence. Note should also be made when the audited State is in conformance with SARPs.

5.9.3 To assist the State in finding early solutions to shortcomings identified, ICAO safety oversight auditors may provide information on findings to their State counterparts on a daily basis.

5.9.4 Visits to selected air transport operators, manufacturing companies, maintenance organizations, training schools and institutes, etc., will be undertaken to verify the State's capability to control and supervise aviation activities. By checking records, not only in the CAA but also in the industry and by looking into how the industry conducts its business in aspects related to the audit, the audit team is able to see whether the CAA is capable of undertaking its oversight responsibilities effectively. However, at no time is it expected to audit the industry nor to take or propose action which could interfere with the conduct of business in the industry. The mandate to audit the capabilities of the civil aviation system only allows that visits to the industry be conducted in the company of the CAA and on the basis of a specific State audit plan agreed upon both by the CAA and SOA. These visits do not constitute an audit of the aviation industry, but are used to assist in determining the State's safety oversight capability.

5.9.5 Audits may result in raising the awareness and interest of several aviation bodies, some of which may request interviews with the audit team. Interviews with organizations other than the CAA, such as the media, unions or other interested bodies, shall only be conducted with the consent and in the presence of a member of the CAA. Information provided by the ICAO team will be limited to explaining the USOAP, its mandate and its objectives.

5.10 AUDIT PROTOCOL

ICAO safety oversight audits will be conducted following the audit protocol established in Chapters 7 to 11 of this manual. Using an established protocol ensures transparency and reliability in the conduct of audits.

5.10.1 The audit protocol is a comprehensive guide, covering all elements of the State's safety oversight programme subject to audit. In some States, the audit protocol may be modified as a result of the size and complexity of its aviation activities. If such modification is judged necessary, the State will be notified and the modifications will be indicated in the State-specific audit plan.

5.10.2 The audit protocol is divided into modules specific to each subject covered. As the ICAO safety oversight programme expands to include other Annexes, additional modules will be added.

5.10.3 Using the verification process described in the audit protocol, the auditors will assess the State's compliance with, conformance with or adherence to the provisions of ICAO SARPs, procedures, guidance material and good aviation practices. In exceptional circumstances, an observation may be made that may have not been addressed by the audit protocol; in these circumstances the concerned auditor will inform the audit team leader and advise the State of the reasons for it. Observations derived under such conditions shall be recorded on the audit finding and recommendation form developed for this purpose.

5.11 AUDIT FINDINGS — NON-COMPLIANCE, NON-CONFORMANCE AND NON-ADHERENCE

An audit finding that identifies lack of compliance with a regulation promulgated by the Contracting State or with a provision of the Chicago Convention will be recorded as a non-compliance. An audit finding that identifies lack of conformance with or implementation of an ICAO Standard will be recorded as a non-conformance. An audit finding that identifies lack of adherence to an ICAO Recommended Practice, procedure, safety-related guidance material or recognized aviation safety practice will be recorded as a non-adherence.

5.11.1 The audit protocol contained in Chapters 7 through 11 of this manual identifies the ICAO SARPs, the related guidance material and the good aviation safety practices that are subject to an ICAO safety oversight audit. The protocol provides the document reference and indicates if it is an Article of the Chicago Convention (CC), an ICAO Standard (STD), a Recommended Practice (RP) or guidance material (GM).

5.11.2 A finding that identifies a lack of compliance with a regulation promulgated by the State or with a provision of the Chicago Convention is recorded as a non-compliance; a finding that identifies a lack of conformance with or implementation of a Standard will be recorded as a non-conformance; and a finding related to a Recommended Practice, procedure or guidance material will be recorded as a non-adherence. The finding and recommendation form will describe the relevant standard auditing procedure and reasons for the finding. If applicable, the form will include recommendations for corrective action. (Examples of ICAO

audit finding and recommendation forms can be found in Appendix C of this manual.)

5.12 POST-AUDIT MEETING

At the end of the audit, the audit team leader will convene a post-audit meeting with the State civil aviation authority's chief executive and staff, as appropriate, to brief them on the audit findings and any resulting recommendations.

5.12.1 The post-audit meeting provides high-level civil aviation authorities with information relating to the findings and recommendations of the audit team. The meeting should ensure that the State authorities clearly understand the situation as audited by the ICAO team and are able to start work on a corrective action plan, if necessary. The meeting should emphasize the most significant safety issues and concisely present the team's findings and opinions regarding the effectiveness of the State's safety oversight activities.

5.12.2 The audit team leader shall inform the State authorities of the follow-up activities, including any requirement for a corrective action plan. The audit team leader will also inform them of the critical dates for the interim, final and summary reports and for the submission of a State's corrective action plan.

5.12.3 The post-audit meeting must include a briefing on all findings and recommendations that will be included in the audit interim report. A draft copy of the findings and recommendations proposed must be provided to the State at the end of the audit, during the post-audit meeting.

5.12.4 The format for the post-audit meeting will be as follows:

- a) review of the objective and scope of the audit;
- b) summary of the audit procedures;
- c) presentation of draft findings and recommendations;
- d) information on the visits to the industry; and
- e) actions by ICAO and the audited State following the audit.

5.12.5 Specialist meetings of the audit team members and the State's technical counterparts may be held prior to or after the post-audit meeting, at the discretion of the audit team leader and the State's civil aviation authorities.

5.13 CORRECTIVE ACTION PLAN

At the completion of an audit, the State has the responsibility to develop a corrective action plan defining action the State plans to take to resolve unfavourable findings within the period determined and agreed upon for this purpose.

5.13.1 Corrective actions and deadlines, as necessary, should be established for each of the audit findings. Together, the corrective actions form the State's corrective action plan.

5.13.2 The State's corrective action plan must be submitted within 30 calendar days after receiving the audit interim report, which was submitted to the State within 30 calendar days following the post-audit meeting.

5.13.3 If deemed necessary, SOA or the Regional Officer, Safety Oversight will establish contact with the audited State within approximately 30 days after ICAO has accepted a State corrective action plan, in order to assess progress made in implementing the accepted corrective action plan. The contact may be effected through a visit to the State or through written or oral communication.

5.13.4 The audit final report will include information on the corrective action plan proposed by the State and accepted by ICAO. If the State is not required to submit a corrective action plan or has not submitted one within the agreed-upon period, the audit final report will be prepared and submitted without any corrective action plan. In the latter case, the final report will indicate that the State has failed to provide a State corrective action plan within the prescribed period.

5.14 AUDIT REPORTS

The products of each safety oversight audit are the briefs and reports prepared and submitted as appropriate. Each safety oversight audit will conclude with the preparation and submission of a confidential audit final report and a non-confidential audit summary report. Detailed information on audit briefs and reports is contained in Chapter 6, 6.1.3.

5.14.1 All briefs and reports will be prepared on the basis of guidance included in Chapter 6 of this manual.

5.14.2 If the audit is made in an ICAO language other than that preferred by the audited State, all reports (except for the post-audit meeting brief) will be delayed by

approximately 30 working days to allow time for translation into the State's preferred ICAO language.

5.14.3 With the exception of the audit summary report, all materials, notes and reports obtained or made during the safety oversight audit will be considered confidential by ICAO. The audited State has the right to publish its audit final report or its corrective action plan and also to request ICAO to do so on its behalf.

5.15 FOLLOW-UP ACTION

If findings of non-conformance with ICAO Standards are revealed during the audit, an audited State will be encouraged to resolve such identified differences. If the State fails to do so and differences still remain during the preparation of the audit final and summary report, the differences will be included in the audit summary report.

Follow-up action will be effected through monitoring the status of implementation of accepted State corrective action plans and completion of audit follow-ups.

The SOA will maintain a status of implementation record of accepted corrective actions. States are required to provide update information as corrective actions are completed, so that the status report can be kept current and an audit follow-up mission planned.

5.16 AUDIT FOLLOW-UP

An audit follow-up will be conducted between one and two years following an audit in order to determine the status of implementation of the corrective action plan.

5.16.1 The primary purpose of an audit follow-up is to determine the status of implementation of the corrective action plan or, in the absence of a corrective action plan, the status of correction of findings noted during the safety oversight audit.

5.16.2 If, incidental to the audit follow-up visit, the audit team has significant concern about the State's conformance with or adherence to SARPs, procedures, guidance material or good aviation safety practices, these concerns will be noted as new findings. New findings will not be included in an audit summary report distributed to Contracting States until the audited State has had an opportunity to develop a new corrective action plan.

5.16.3 The standard auditing procedures applied to the audit follow-up will be the same as for a regular safety oversight audit. The exception is the difference in scope, as audit follow-ups can be limited in certain cases only to issues identified during the initial audit.

5.16.4 The audit follow-up team will normally consist of an audit team leader and other members as required, depending on the scope of the audit. Audit team members for an audit follow-up may or may not have been members of the original audit team, at the discretion of C/SOA.

5.16.5 Audit follow-ups are covered by Article 18 in the MOU (see Appendix B), signed by the Secretary General and the State's civil aviation authority.

5.17 ORDER OF AUDITS

Safety oversight audits will be carried out in accordance with the order of audit criteria approved by the ICAO Council during its 155th Session.

5.17.1 The ICAO annual audit and follow-up audit plan will be established in accordance with criteria approved by the ICAO Council. Adjustments to the order will be considered by the SOA in order to improve efficiency by taking into consideration issues such as proximity of States to be audited, languages to be used, etc., which could significantly reduce the cost of conducting an audit.

5.17.2 The following priority criteria have been approved by the ICAO Council:

- a) expressed urgency to audit a particular State;
- b) regional balance, including the percentage of States assessed in each ICAO region;
- c) completion of any outstanding audits from the voluntary programme; and
- d) State requests to be audited.

5.18 AUDIT TEAM LEADER'S MISSION REPORT

ICAO audit team leaders will prepare a separate report describing the conduct of the audit, difficulties encountered and proposals to improve the planning and conduct of audits.

5.18.1 The audit team leader's mission report provides feedback on the conduct of the audit, from planning to completion. The mission report is an integral part of the quality assurance programme and will be used by the SOA to improve audit planning.

5.18.2 The SOA will maintain a record of all feedback and recommendations made in the audit team leader's mission report and of action taken by SOA to address concerns raised.

5.18.3 Should the audit team leader's mission report identify issues which may be addressed through the

amendment of SARPs, the information will be relayed to the Director of ICAO's Air Navigation Bureau.

5.19 STATE AUDIT FEEDBACK FORM

A State confidential audit feedback form will be provided to the State's civil aviation authority at the end of the audit, during the post-audit meeting. The purpose of this form is to allow the State to inform on the way the audit was planned and conducted, as well as to provide for continuous improvement of the ICAO universal safety oversight audit programme.

Chapter 6

AUDIT REPORTS

6.1 GENERAL

The audit report is an objective reflection of the results of the safety oversight audit. It is prepared on the basis of the reporting policies and principles contained in this manual.

6.1.1 The various audit reports are prepared to:

- a) provide information to the audited State regarding the status of implementation of ICAO SARPs, procedures, safety-related guidance material and good aviation safety practices;
- b) demonstrate the need to initiate corrective actions;
- c) provide ICAO with information on differences to ICAO Standards; and
- d) provide other Contracting States with an abstract summary of the status of safety oversight activities in the audited State.

6.1.2 Key principles in the development of the audit reports are:

- a) consistency of findings and recommendations in the post-audit meeting brief, audit interim report and audit final report;
- b) conclusions substantiated with references;
- c) findings and recommendations stated clearly and concisely;
- d) avoidance of generalities and vague observations;
- e) objective presentation of audit findings;
- f) use of widely accepted aviation terminology, avoiding acronyms and jargon; and
- g) avoidance of criticism of individuals or positions.

6.1.3 The following audit briefs and reports are prepared and submitted, as required and applicable, in conformity with the predetermined time frame:

- a) the post-audit meeting brief, explaining draft findings and recommendations of the audit,

addressed to State authorities and submitted on the final day of the audit;

- b) the audit interim report, containing the official report on findings and recommendations of the audit, addressed to State authorities and submitted within 30 calendar days after the final day of the audit;
- c) the preliminary review brief, if required, prepared by the Regional Officer, Safety Oversight within 30 calendar days following the acceptance of the State corrective action plan and forwarded to C/SOA to be considered in the preparation of the audit final report;
- d) the audit final and summary reports, the former containing the official report on the findings, recommendations, proposed State corrective action plan and action plan initiated, and the latter containing an abstract thereof, addressed to State authorities approximately 150 calendar days after the completion of the audit;

Note.— The audit summary report is first forwarded to the audited State for comments, which will be taken into account prior to forwarding the audit summary report to all Contracting States.

- e) a non-confidential audit summary report, containing an abstract of the findings and recommendations and the State's proposed corrective action plan and action initiated thereon, forwarded to all Contracting States approximately 180 calendar days after the completion of the audit.

6.1.4 Audit briefs and reports will be prepared following a standard reporting format developed by the SOA. This format permits input to an electronic database, facilitating the retrieval of information for follow-up action.

6.2 AUDIT INTERIM REPORT

The audit interim report is a confidential formal report of the audit containing full details of the audit findings and recommendations.

6.2.1 The audit interim report is the official and formal report of findings and recommendations submitted to the State after the completion of the audit. The State corrective action plan will be based on the audit interim report, although the State was provided the opportunity to initiate its corrective action plan on the basis of the draft findings and recommendations. The audit interim report forms the basis for the preparation of the audit final report and is superseded by the audit final report when completed.

6.2.2 The audit interim report is prepared by the SOA at ICAO Headquarters on the basis of the draft interim report and the draft findings and recommendations submitted by the audit team leader. The audit interim report will be available only to the audited State and to the Regional Director of the accredited ICAO Regional Office. The SOA will retain a file copy.

6.2.3 The contents of the audit interim report are:

1. *Introduction*
 - 1.1 List of ICAO documents related to the safety oversight audit
 - 1.2 List of State documents
 - 1.3 Background
 - 1.4 Safety oversight audit team composition
 - 1.5 State officials and aviation industry personnel contacted
 - 1.6 Acknowledgement
2. *Objectives and activities of the mission*
3. *Aviation activities in the State*
4. *Summary of findings*
5. *Audit results*
 - 5.1 Primary aviation legislation
 - 5.2 Civil aviation regulations
 - 5.3 Civil aviation organization system
 - 5.4 Personnel licensing and training
 - 5.5 Aircraft operations certification and supervision
 - 5.6 Airworthiness of aircraft
 - 5.7 Visits to the aviation industry
6. *Follow-up action*
7. *Appendices*
8. *Attachments*

6.3 PRELIMINARY REVIEW BRIEF

A preliminary review brief may be submitted to C/SOA by the Regional Officer, Safety Oversight detailing progress made in implementing the State corrective action plan accepted by ICAO.

6.3.1 A preliminary review brief may be submitted detailing the findings of a review made by the Regional Officer, Safety Oversight within 30 days after the State corrective action plan has been accepted.

6.3.2 There are no standardized briefing formats, as the preliminary review brief may differ from State to State. The brief should, however, include information which will enable C/SOA to assess progress made in the implementation of the State's corrective action plan in order to be able to include this information in the audit final report. The preliminary review brief should include progress reported or observed and information on the completion date of corrective action in progress, if available.

6.4 AUDIT FINAL REPORT

The audit final report is an official and confidential report. It contains the detailed information found in the audit interim report as well as the State's corrective action plan and an analysis of progress made on the implementation of that plan.

6.4.1 The audit final report represents the official and actual report of the audit. The structure and contents of the audit final report will be similar to the audit interim report, with the exception that the audit final report will include an analysis of the corrective action plan submitted by the audited State, information on the progress made by the audited State on the implementation of the corrective action plan, and information on any remedied deficiencies and outstanding differences to ICAO SARPs.

6.4.2 The audit final report will be made available only to the audited State and to the Regional Director of the accredited ICAO Regional Office. The SOA will retain a file copy.

6.4.3 The SOA staff, in coordination with the Technical Coordinator and the Standards and Procedures Officers, are responsible for preparing the audit final report.

6.5 AUDIT SUMMARY REPORT

A non-confidential audit summary report will be prepared and forwarded to all ICAO Contracting States following the predetermined schedule of report submissions indicated in the audit cycle (see Figures 5-1(a) and 5-1(b)).

6.5.1 An audit summary report providing an overview of an audited State's conformance with, or adherence to, ICAO SARPs, procedures, safety-related guidance material and good safety practices will be prepared with the audit final report and forwarded to the audited State for comments prior to its distribution to States.

6.5.2 The primary objective of distributing the audit summary report is to enhance aviation safety. The audit summary report will be prepared in such a way as to enable ICAO Contracting States to form their own opinion of the status of safety oversight activities in the audited State.

6.5.3 The SOA staff, in coordination with the Technical Coordinator and the Standards and Procedures Officers, are responsible for preparing the audit summary report. It will contain at least the following items:

- a) background;
- b) aviation activities in the State;
- c) summary of findings;
- d) comments;
- e) ICAO SARPs not implemented; and
- f) attachments.

6.6 STATE CORRECTIVE ACTION PLAN

Following the post-audit meeting, the audited State is required to develop a State corrective action plan addressing each finding resulting in the provision of a recommendation.

6.6.1 The State's corrective action plan responds to the audit findings and recommendations by proposing action to bring the State's regulatory framework into conformance with, or adherence to, ICAO SARPs, procedures, safety-related guidance material and good safety practices.

6.6.2 The audited State is expected to initiate work on a corrective action plan at the completion of the audit. The allotted time for completion of the corrective action plan is 30 calendar days from receipt of the audit interim report, or approximately 60 calendar days from the day the post-audit meeting was conducted and a copy of the draft findings and recommendations provided to the State.

6.6.3 The State's corrective action plan should contain information relevant to the audit conducted and respond to each recommendation resulting from an audit finding. The State corrective action plan should provide detailed information of action to be taken, including a time frame for the commencement and completion of each action, and must be signed by the authorized CAA chief executive or Government official, as appropriate.

Chapter 6A

AUDIT FOLLOW-UP PROCEDURES

6A.1 AUDIT FOLLOW-UP AND ACTION PLAN VALIDATION

An audit follow-up mission to validate the satisfactory implementation of the State's corrective action plan will be conducted between one and two years following an audit. The audit follow-up mission will also allow ICAO to update and validate the safety data collected during safety oversight audits and to enter current information into the Audit Findings and Differences Database (AFDD) referred to in 6.1.4 of this manual.

6A.1.1 The primary purpose of an audit follow-up is to validate the effective implementation of the corrective action plan submitted by the audited State following the initial audit or, in the absence of a corrective action plan, the status of correction of findings noted during the safety oversight audit. As applicable, quality assurance notes from the analysis and validation of the contents of the audit final report will be brought to the attention of the audited State and explained by the audit follow-up team on site. Audit follow-up reporting forms and checklists should be completed for each audit finding (see Appendices E and F).

6A.1.2 If, incidental to the follow-up mission, the audit follow-up team has significant concerns about safety issues in relation to the State's conformance with or adherence to SARPs, procedures, guidance material, or good aviation safety practices, it will record those concerns as "observations" requiring corrective action by the audited State. Such observations, together with recommendations for corrective action, will be recorded on the form prepared for that purpose (see Appendix G). The observations will be included in a separate section of the audit follow-up report, and the audited State will be encouraged to submit a corrective action plan. Observations will not be included in the non-confidential follow-up summary report.

6A.1.3 The audit follow-up procedures to be followed are similar to the standard auditing procedures applied during

a regular safety oversight audit. However, audit follow-up missions are generally limited to ascertaining whether safety issues identified during the initial audit have been satisfactorily resolved.

6A.1.4 The audit follow-up team will normally consist of a team leader and other members as required, depending on the complexity of the audit findings and validation exercise to be conducted. The audit follow-up team members assigned to a follow-up mission may or may not have been members of the original audit team.

6A.1.5 Audit follow-ups are covered by Article 18 in the MOU (see Appendix B), signed by the Secretary General and the State's civil aviation authority.

6A.1.6 States will be notified of a forthcoming follow-up mission by means of a letter from the Director of the Air Navigation Bureau. This formal notification will follow the State letter forwarded to all Contracting States twice a year, providing information on a tentative plan for a follow-up mission on the basis of the period of the initial audit and the State's corrective action plan.

6A.1.7 The timeline for activities following a safety oversight audit follow-up is illustrated in Figure 6A-1.

6A.1.8 A confidential follow-up report will be submitted to the audited State within 30 calendar days following the completion of the follow-up mission.

6A.1.9 Thirty calendar days after receiving the confidential follow-up report, a State should submit its feedback and comments, if any. ICAO will publish and distribute a non-confidential follow-up summary report within 60 calendar days following the submission of the follow-up report to the State (30 calendar days after receiving a State's comments and feedback, if any).

6A.1.10 The information contained in the non-confidential follow-up summary report should only be used for enhancing aviation safety.

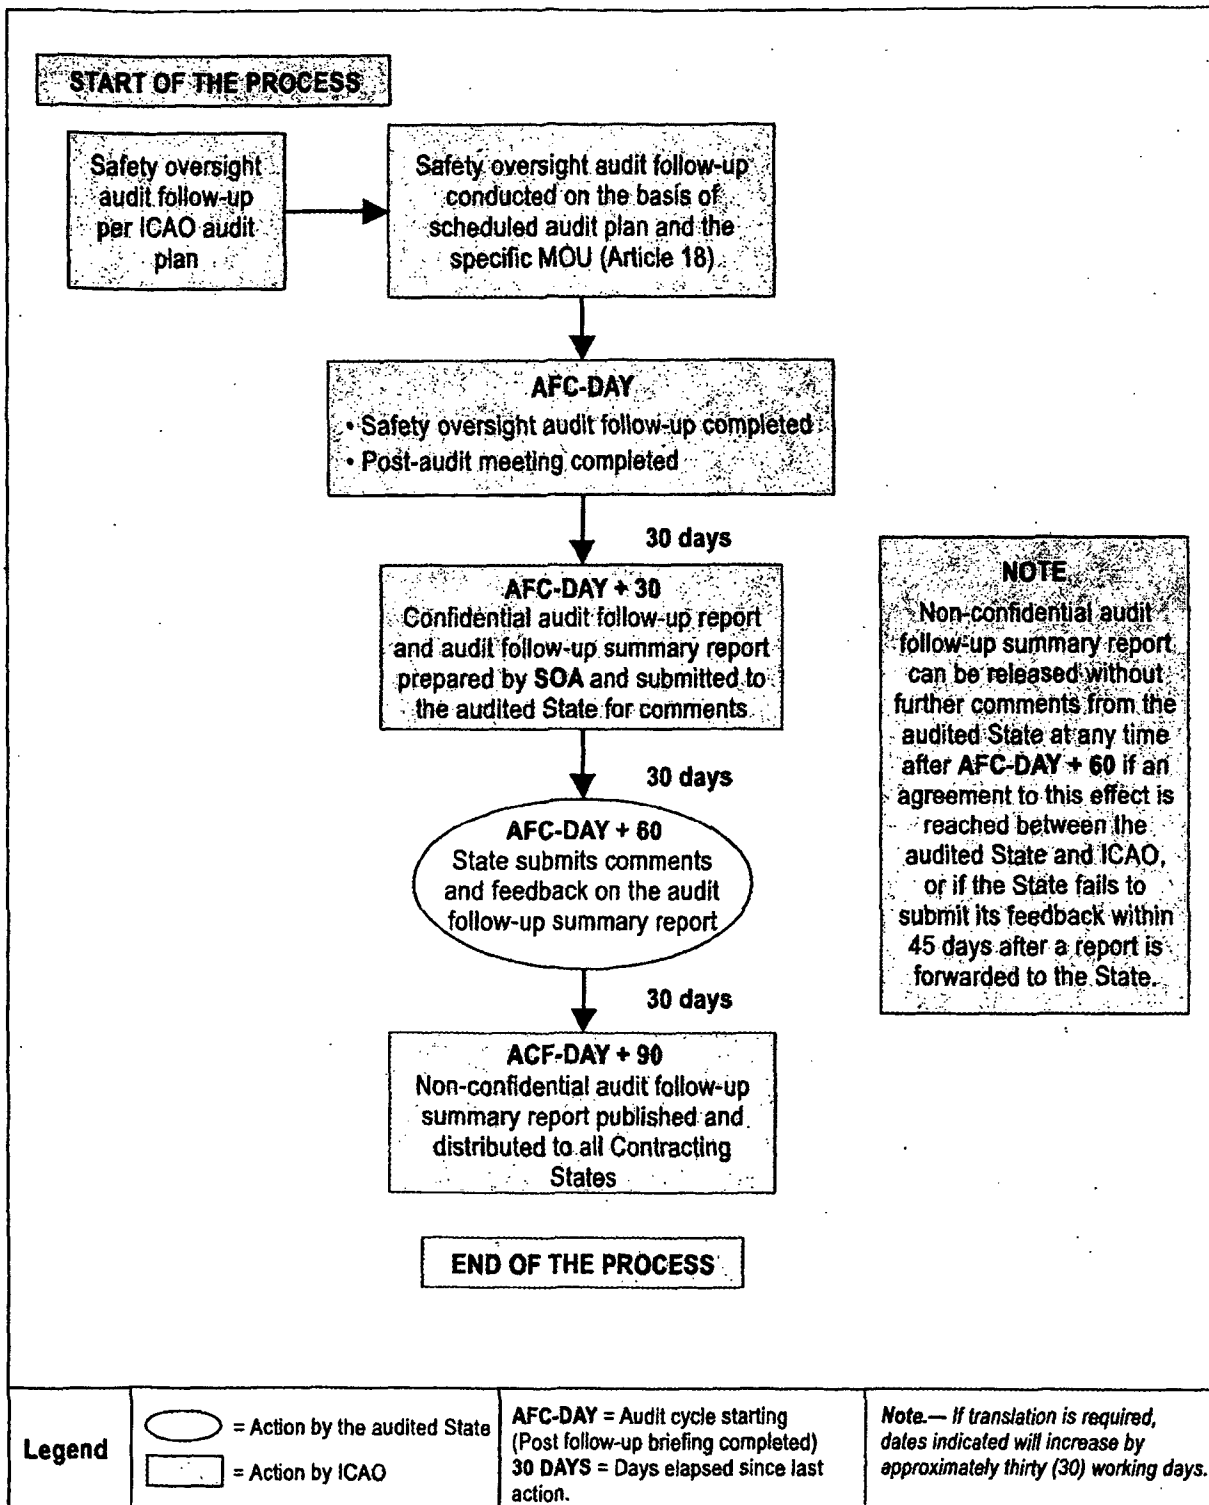

Figure 6A-1. Audit cycle for safety oversight audit follow-up

Chapter 7

AUDIT PROTOCOL —

Primary Aviation Legislation and Civil Aviation Regulations

7.1 GENERAL

7.1.1 This chapter contains the standard auditing procedures for the conduct of audits of the State's legislative and regulatory framework. It provides both the auditors and the State with a step-by-step guide to verification of the status of implementation.

7.1.2 The audit protocol indicates whether the provision in the reference document complies with, conforms with, or adheres to, requirements of the Chicago Convention (CC), an Annex Standard (STD), an Annex Recommended Practices (RP), or an ICAO document guidance material.

7.2 CONTENT OF THE AUDIT PROTOCOL

7.2.1 The audit protocol in this chapter contains four parts:

1. Promulgation and amendment procedures (LEG 1.000);
2. Enforcement procedures (LEG 1.030);
3. Empowerment of inspectors (LEG 1.050); and
4. Ratification and implementation of Article 83 *bis* (LEG 1.060).

Chapter 8

AUDIT PROTOCOL —

Organization of the State's Civil Aviation Authority

8.1 GENERAL

8.1.1 This chapter contains the standard auditing procedures for the conduct of audits of the organization of the State's civil aviation authority. It provides both the auditors and the State with a step-by-step guide to verification of the status of implementation.

8.1.2 The audit protocol indicates whether the provision in the reference document complies with, conforms with, or adheres to, requirements of the Chicago Convention (CC), an Annex Standard (STD), an Annex Recommended Practice (RP), or an ICAO document guidance material (GM).

8.2 CONTENT OF THE AUDIT PROTOCOL

8.2.1 The audit protocol in this chapter contains seven parts:

1. Civil aviation organization system — Legal status (ORG 2.000);
2. Establishment (ORG 2.030);
3. Other organizations or departments with civil aviation responsibilities (ORG 2.040);
4. Staffing constitution and recruitment policy (ORG 2.050);
5. Staff general training policy (ORG 2.060);
6. Documentation and technical library (ORG 2.080);
7. Resources (ORG 2.090);

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
ORG 2.000 — Civil aviation organization system — Legal status				
GM Doc 8335 2.3 Doc 9734 3.4	ORG 2.001 What type of organizational structure is in place? 1. Aviation ministry <input type="checkbox"/> 2. Ministry department <input type="checkbox"/> 3. State's aviation office <input type="checkbox"/> 4. Autonomous agency <input type="checkbox"/> 5. Civil aviation department <input type="checkbox"/> 6. Civil aviation authority <input type="checkbox"/> 7. Other (specify) <input type="checkbox"/>			
Doc 9734 3.4	ORG 2.002 What is the actual name and the acronym of the civil aviation organization established?			
GM Doc 8335 2.3 Doc 9734 3.4	ORG 2.003 What is the legal basis for the civil aviation organization system? 1. the primary aviation legislation <input type="checkbox"/> 2. other (specify) <input type="checkbox"/>			
ORG 2.030 — Establishment				
Doc 9734 3.4	ORG 2.031 Has a master organizational structure (line diagram) for the civil aviation organization system been established?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Doc 7604 Doc 9734 3.4	ORG 2.032 Is the organizational structure published in ICAO Doc 7604 — <i>Information on National Civil Aviation Departments</i> ?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Doc 7604 Doc 9734 3.4	ORG 2.033 Are there differences between the information contained in ICAO Doc 7604 and the current organizational structure established in the State?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
Doc 9734 3.4	ORG 2.034 Has the State established regional offices reporting to Headquarters, with responsibility for safety oversight?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
ICAO references: CC = Chicago Convention; STD = Standard; RP = Recommended Practice; GM = Guidance material.				

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
Doc 9734 3.4	ORG 2.035 If yes, how many regional offices reporting to Headquarters have been established?			
Doc 9734 3.4	ORG 2.036 If yes, what is the extent of their responsibility and has the civil aviation administration established a system for coordination and/or control for the implementation of regional authority?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
Doc 9734 3.4	ORG 2.037 If yes, are procedures in place for delegation of authority from Headquarters to the regional offices?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
ORG 2.040 — Other organizations or departments with civil aviation responsibilities				
Doc 9734 3.4	ORG 2.041 Are there additional authorities, other than the civil aviation administration, dealing with civil aviation subjects (e.g. airport authority, aviation accident investigation board, etc.)?	<input type="checkbox"/> Yes <input type="checkbox"/> No		
Doc 9734 3.4	ORG 2.042 If yes, what are they and what is the objective of their establishment?			
Doc 9734 3.4	ORG 2.043 Is there a perceived overlap of responsibilities or a conflict of interest among the various authorities dealing with civil aviation?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
Doc 9734 3.4	ORG 2.044 If yes, please explain the overlap of responsibilities and, if possible, its impact on safety.		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited

Chapter 9

AUDIT PROTOCOL — Personnel Licensing (Annex 1)

9.1 GENERAL

9.1.1 This chapter contains the standard auditing procedures for the conduct of audits of personnel licensing. It provides both the auditors and the State with a step-by-step guide to verification of the status of implementation.

9.1.2 The audit protocol indicates whether the provision in the reference document complies with, conforms with, or adheres to, requirements of the Chicago Convention (CC), an Annex Standard (STD), an Annex Recommended Practice (RP), or an ICAO document guidance material (GM).

9.2 CONTENT OF THE AUDIT PROTOCOL

9.2.1 The audit protocol in this chapter contains 20 parts:

1. Personnel licensing and training system — Regulatory background (PEL 3.000);
2. Organization and staffing of the personnel licensing and training system (PEL 3.050);
3. Procedures established for personnel licensing and rating — Application for a licence and/or rating (PEL 3.100);
4. Procedures established for personnel licensing and rating — Processing of applications (PEL 3.110);
5. Procedures established for personnel licensing and rating — Licences issued directly by States (PEL 3.150);
6. Procedures established for personnel licensing and rating — Licences and ratings issued on the basis of foreign licences (Conversion of licences) (PEL 3.160);

7. Procedures established for personnel licensing and rating — Validation of foreign licences (PEL 3.170);
8. Procedures established for personnel licensing and rating — Acceptance of military qualifications (PEL 3.180);
9. Procedures established for personnel licensing and rating — Renewal, recency and maintenance of competency (PEL 3.190);
10. Procedures established for personnel licensing and rating — Processing of medical assessments (PEL 3.200);
11. Procedures established for personnel licensing and rating — Medical assessment and medical examiners (PEL 3.210);
12. Control and supervision of licences and ratings issued — Examinations and tests (PEL 3.220);
13. Control and supervision of licences and ratings issued — Written and oral examinations (PEL 3.230);
14. Control and supervision of licences and ratings issued — Examiners (written and oral examinations) (PEL 3.240);
15. Control and supervision of licences and ratings issued — Practical and flight examinations (PEL 3.250);
16. Control and supervision of licences and ratings issued — Examiners (flight examinations) (PEL 3.260);
17. Control and supervision of licences and ratings issued — Records (PEL 3.270);
18. Control and supervision of licences and ratings issued — Physical specifications of licences (PEL 3.280);
19. Control and supervision of training institutes and/or aviation schools (PEL 3.300); and
20. Status of implementation and differences to ICAO SARPs (PEL 3.400).

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
PEL 3.000 — Personnel licensing and training system — Regulatory background				
GM Doc 8335 1.2.1 & 1.2.2 Doc 9734 3.3.5	PEL 3.001 Has the State developed and promulgated personnel licensing regulations to enable the State to implement the provisions of Annex 1?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 1.2.1 & 1.2.2 Doc 9734 3.3.5	PEL 3.002 If yes, what is the formal title of the regulations and when were they promulgated? (List all the regulations related to personnel licensing.)			
CC Art. 37 Doc 9734 3.3.5	PEL 3.003 If the State has not promulgated specific personnel licensing regulations, what method is used to comply with the provisions of the Chicago Convention and its Annex 1?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited

Chapter 10

AUDIT PROTOCOL — Operation of Aircraft (Annex 6)

10.1 GENERAL

10.1.1 This chapter contains the standard auditing procedures for the conduct of audits of the operation of aircraft. It provides both the auditors and the State with a step-by-step guide to verification of the status of implementation.

10.1.2 The audit protocol indicates whether the provision in the reference document complies with, conforms with, or adheres to, requirements of the Chicago Convention (CC), an Annex Standard (STD), an Annex Recommended Practice (RP), or an ICAO document guidance material (GM).

10.2 CONTENT OF THE AUDIT PROTOCOL

10.2.1 The audit protocol in this chapter contains 14 parts:

1. Aircraft operations certification — Regulatory background (OPS 4.000);
2. Organization and staffing of the aircraft operations certification system (OPS 4.050);
3. Procedures established for aircraft operations certification — AOC application information (OPS 4.100);
4. Procedures established for aircraft operations certification — AOC formal application (OPS 4.125);
5. Procedures established for aircraft operations certification — Operations inspection prior to certification (OPS 4.150);
6. Procedures established for aircraft operations certification — Prevention of controlled flight into terrain (CFIT) (OPS 4.225);
7. Procedures established for aircraft operations certification — The transport of dangerous goods (OPS 4.250)
8. Procedures established for aircraft operations certification — Aircraft lease, charter and interchange (OPS 4.300);
9. Procedures established for aircraft operations certification — Issuance of the air operator certificate (AOC) (OPS 4.350);
10. Procedures established for aircraft operations certification — System in place for the certification of commercial air transport operators (OPS 4.400);
11. Aircraft operations supervision — Regulatory background (OPS 4.500);
12. Organization and staffing of the aircraft operations supervision system (OPS 4.525);
13. Procedures established for aircraft supervision — Surveillance programme (OPS 4.550);
14. Status of implementation and differences to ICAO SARPs (OPS 4.600).

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
OPS 4.000 — Aircraft operations certification — Regulatory background				
GM Doc 8335 1.2.1 & 1.2.2	OPS 4.001 Has the State developed and promulgated aircraft operations regulations to enable the State to implement the provisions of Annex 6?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 1.2.1 & 1.2.2	OPS 4.002 If yes, what is the formal title of the regulations and when were they promulgated? (List all the regulations related to aircraft operations.)			
GM Doc 8335 2.4	OPS 4.003 Are amended and up-to-date copies of aircraft operation regulations used by the State readily available to operations inspectors?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 2.4	OPS 4.004 Does each operations inspector have a current copy of the State's aircraft operations regulations?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 2.4	OPS 4.005 Does the aircraft operations organization have an example of an order, directive and/or instruction issued in support of its aircraft operations activities?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
	OPS 4.006 Does the aircraft operations organization have a technical library?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
	OPS 4.007 Are the relevant ICAO documents and other technical documents readily available to the technical and administrative staff of the aircraft operations organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
ICAO references: CC = Chicago Convention; STD = Standard; RP = Recommended Practice; GM = Guidance material.				

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 8335 2.4	OPS 4.008 Does the aircraft operations organization have a current copy of Annex 6 — <i>Operation of Aircraft</i> available?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
OPS 4.050 — Organization and staffing of the aircraft operations certification system				
GM Doc 8335 9.1	OPS 4.051 Is there an aircraft operations organization established as part of the certification and supervision system of the State?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.1	OPS 4.052 Is there an organizational chart of the aircraft operations organization (operations inspectorate) available?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.1	OPS 4.053 Is the aircraft operations organization integrated by: 1. operations only <input type="checkbox"/> Yes <input type="checkbox"/> No 2. operations and airworthiness <input type="checkbox"/> Yes <input type="checkbox"/> No 3. different specialties <input type="checkbox"/> Yes <input type="checkbox"/> No			
GM Doc 8335 9.1	OPS 4.054 If the operations inspection organization is not a combined one, what provisions are made for cooperation with other personnel responsible for flight safety regulations?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 8335 9.2	<p>OPS 4.055 What are the responsibilities of the aircraft operations organization?</p> <p>1. recommendations regarding issuance of the Air Operator Certificate <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>2. recommendations on specific authorizations <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>3. information regarding deficiencies <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>4. development or revision of regulations <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>5. recommendations regarding enforcement <input type="checkbox"/> Yes <input type="checkbox"/> No</p>		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
	<p>OPS 4.056 How many operations inspectors work in each specialized area of the operations inspectorate organization?</p> <p>1. Headquarters:</p> <ul style="list-style-type: none"> flight operations ground operations dangerous goods ramp checks cabin safety enforcement only <p>2. Regional offices (if applicable):</p> <ul style="list-style-type: none"> flight operations ground operations dangerous goods ramp checks cabin safety enforcement only 		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 8335 9.3.1 & 9.4	OPS 4.057 What qualifications are operations inspectorate staff required to have? 1. airline transport pilot <input type="checkbox"/> Yes <input type="checkbox"/> No 2. commercial pilot <input type="checkbox"/> Yes <input type="checkbox"/> No 3. airline flight crew <input type="checkbox"/> Yes <input type="checkbox"/> No 4. flight dispatcher <input type="checkbox"/> Yes <input type="checkbox"/> No 5. ATC controller <input type="checkbox"/> Yes <input type="checkbox"/> No 6. previous experience <input type="checkbox"/> Yes <input type="checkbox"/> No 7. other (specify) <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.6.1	OPS 4.058 Is there a formal inspector handbook for the use and guidance of members of the operations inspection organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.6.1	OPS 4.059 Does the inspector handbook contain policy and procedures for: 1. certification <input type="checkbox"/> Yes <input type="checkbox"/> No 2. inspection <input type="checkbox"/> Yes <input type="checkbox"/> No 3. surveillance <input type="checkbox"/> Yes <input type="checkbox"/> No 4. enforcement <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.3.1 & 9.4	OPS 4.060 Is a personnel file record for each operations inspector available for review?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.3.2	OPS 4.061 Does the personal file record of flight operations inspectors contain information on flight activity, such as recency of experience, flight or simulator training, competency checks, ratings, etc.?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.7.2	OPS 4.062 Is there a formal training programme for the technical personnel of the operations inspection organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

ICAO ref	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 8335 9.7.2	OPS 4.063 Is there formal recurrent training for the technical personnel of the operations inspection organization?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.7	OPS 4.064 What kinds of training (initial and recurrent) do aircraft operations inspectors receive? 1. accident investigation training <input type="checkbox"/> Yes <input type="checkbox"/> No 2. accident prevention training <input type="checkbox"/> Yes <input type="checkbox"/> No 3. flight safety training <input type="checkbox"/> Yes <input type="checkbox"/> No 4. technical report writing <input type="checkbox"/> Yes <input type="checkbox"/> No 5. supervisory training <input type="checkbox"/> Yes <input type="checkbox"/> No 6. flight training <input type="checkbox"/> Yes <input type="checkbox"/> No 7. flight dispatch training <input type="checkbox"/> Yes <input type="checkbox"/> No 8. dangerous goods training <input type="checkbox"/> Yes <input type="checkbox"/> No 9. cabin safety training <input type="checkbox"/> Yes <input type="checkbox"/> No 10. enforcement training <input type="checkbox"/> Yes <input type="checkbox"/> No 11. quality assurance <input type="checkbox"/> Yes <input type="checkbox"/> No 12. Human Factors <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 9.7.2	OPS 4.065 Where is the operations inspectors' training taken? 1. in-house <input type="checkbox"/> Yes <input type="checkbox"/> No 2. national institutes or schools <input type="checkbox"/> Yes <input type="checkbox"/> No 3. foreign institutes or schools <input type="checkbox"/> Yes <input type="checkbox"/> No 4. national air operators <input type="checkbox"/> Yes <input type="checkbox"/> No 5. foreign air operators <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
OPS 4.100 — Procedures established for aircraft operations certification — AOC application information				
GM Doc 8335 3.2	OPS 4.101 Is the information concerning the application for an AOC established for a prospective commercial air transport operator?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 3.3	OPS 4.102 Is the information concerning the application for an amendment to the AOC established for an air operator?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 8335 3.3	OPS 4.103 Is there an established formal application form for an AOC that a prospective commercial air transport operator must complete and submit?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 3.2	OPS 4.104 Is there a form for an amendment to the AOC established that an air operator must complete and submit?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited

CC Art. 37	OPS 4.606 If the State has not promulgated specific aircraft operation regulations, what method is used to comply with the provisions of the Chicago Convention and its Annex 6?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

Chapter 11

AUDIT PROTOCOL —

Airworthiness of Aircraft (Annex 8)

11.1 GENERAL

11.1.1 This chapter contains standard auditing procedures for the conduct of audits of the airworthiness of aircraft. It provides both the auditors and the State with a step-by-step guide to verification of the status of implementation.

11.1.2 The audit protocol indicates whether the provision in the reference document complies with, conforms with, or adheres to, requirements of the Chicago Convention (CC), an Annex Standard (STD), an Annex Recommended Practice (RP), or an ICAO document guidance material.

11.2 CONTENT OF THE AUDIT PROTOCOL

11.2.1 The audit protocol in this chapter contains 36 parts:

1. Airworthiness Inspection Division — Regulatory background (AIR 5.000);
2. Organization and staffing of the airworthiness inspection division (AID) (AIR 5.025);
3. Airworthiness inspection division — Delegation of authority (AIR 5.050);
4. Type design validation (AIR 5.060);
5. Import requirements (AIR 5.070);
6. Approval of modifications and repairs (AIR 5.080);
7. Issue of individual certificate of airworthiness (AIR 5.100);
8. Renewal and continuing validity of certificates of airworthiness (CofA) (AIR 5.150);
9. Flight permits (AIR 5.250);
10. Airworthiness approvals for export (AIR 5.270);
11. Certification of commercial air transport operators (AIR 5.300);
12. Operator's maintenance arrangements and contracting (AIR 5.310);
13. Operator's maintenance control manual (AIR 5.320);
14. Operator's maintenance programme (AIR 5.330);
15. Specific operating provisions (AIR 5.350);
16. Continuing airworthiness information (AIR 5.400);
17. Lease agreements, charters and interchange of aircraft (AIR 5.470);
18. Surveillance of operators (AIR 5.480);
19. Approval of maintenance organizations (AMO) (AIR 5.500);
20. AMO's maintenance procedures manual (AIR 5.520);
21. AMO's facilities (AIR 5.530);
22. AMO's personnel (AIR 5.550);
23. AMO's records and documentation (AIR 5.560);
24. AMO's maintenance release (AIR 5.565);
25. Surveillance of AMOs (AIR 5.575);
26. Exchange of continuing airworthiness information (AIR 5.600);
27. Accident/incident investigation (AIR 5.650);
28. Status of implementation and differences to ICAO SARPs (AIR 5.660);
29. Aircraft engineering/manufacturing certification and surveillance — Regulatory background (AIR 5.700);
30. Organization and staffing of aircraft engineering/manufacturing system — Airworthiness engineering division (AED) (AIR 5.710);
31. Delegation of authority (AIR 5.740);
32. Design organizations (AIR 5.750);
33. Type design approval (AIR 5.760);
34. Certificate of airworthiness — Production (AIR 5.800);
35. Import and export certification requirements (AIR 5.810); and
36. Status of implementation and differences to ICAO SARPs (AIR 5.850).

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments												
AIR 5.000 — Airworthiness Inspection Division — Regulatory background																
GM Doc 8335 1.2.1 & 1.2.2	AIR 5.001 Has the State developed and promulgated airworthiness regulations to enable the State to implement the provisions of Annexes 6, Chapters 8 & 11 and Annex 8?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited													
GM Doc 8335 1.2.1 & 1.2.2	AIR 5.002 If yes, what is the formal title of the regulations and when were they promulgated? (List all the regulations related to airworthiness.)															
GM Doc 8335 2.4	AIR 5.003 Are amended and up-to-date copies of airworthiness regulations used by the State readily available to the users? If yes, describe the means available to access the regulations.	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited													
GM Doc 8335 2.4	AIR 5.004 Does each airworthiness inspector/engineer have a current copy of the State's airworthiness regulations?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited													
GM Doc 9389 4.6	AIR 5.005 Is there an airworthiness technical library available for airworthiness engineers and inspectors?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited													
GM Doc 9389 4.6	AIR 5.006 Do airworthiness engineers and inspectors have access to: <table border="0" style="margin-left: 20px;"> <tr> <td>1. ICAO documentation</td><td><input type="checkbox"/> Yes</td><td><input type="checkbox"/> No</td></tr> <tr> <td>2. State laws/regulations</td><td><input type="checkbox"/> Yes</td><td><input type="checkbox"/> No</td></tr> <tr> <td>3. orders/instructions</td><td><input type="checkbox"/> Yes</td><td><input type="checkbox"/> No</td></tr> <tr> <td>4. copies of airworthiness directives (AD)</td><td><input type="checkbox"/> Yes</td><td><input type="checkbox"/> No</td></tr> </table>	1. ICAO documentation	<input type="checkbox"/> Yes	<input type="checkbox"/> No	2. State laws/regulations	<input type="checkbox"/> Yes	<input type="checkbox"/> No	3. orders/instructions	<input type="checkbox"/> Yes	<input type="checkbox"/> No	4. copies of airworthiness directives (AD)	<input type="checkbox"/> Yes	<input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
1. ICAO documentation	<input type="checkbox"/> Yes	<input type="checkbox"/> No														
2. State laws/regulations	<input type="checkbox"/> Yes	<input type="checkbox"/> No														
3. orders/instructions	<input type="checkbox"/> Yes	<input type="checkbox"/> No														
4. copies of airworthiness directives (AD)	<input type="checkbox"/> Yes	<input type="checkbox"/> No														
ICAO references: CC = Chicago Convention; STD = Standard; RP = Recommended Practice; GM = Guidance material.																

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 9389 4.6	AIR 5.007 Do airworthiness engineers and inspectors have access to design organization documentation: 1. aircraft flight manual <input type="checkbox"/> Yes <input type="checkbox"/> No 2. maintenance manual <input type="checkbox"/> Yes <input type="checkbox"/> No 3. structural repair manual <input type="checkbox"/> Yes <input type="checkbox"/> No 4. service bulletins <input type="checkbox"/> Yes <input type="checkbox"/> No 5. MMEL <input type="checkbox"/> Yes <input type="checkbox"/> No 6. MRB report <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
A6 C8 8.7.2.1 8.7.2.4 8.7.3.2	AIR 5.008 Are up-to-date copies kept of: 1. maintenance organization procedures manuals <input type="checkbox"/> Yes <input type="checkbox"/> No 2. operator maintenance control manuals <input type="checkbox"/> Yes <input type="checkbox"/> No 3. maintenance programmes <input type="checkbox"/> Yes <input type="checkbox"/> No		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 8335 2.4	AIR 5.009 Does the airworthiness technical library have a current copy of Annex 6 — <i>Operation of Aircraft</i> , Chapters 8 and 11 and Annex 8 — <i>Airworthiness</i> available?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
AIR 5.025 — Organization and staffing of the airworthiness inspection division (AID)				
GM Doc 9389 C4	AIR 5.026 Has an airworthiness inspection division (AID) been established?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
Doc 9389 4.5.1	AIR 5.027 Is there a document that clearly establishes the duties and responsibilities of the airworthiness inspection division (AID) and within the AID?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
	AIR 5.028 Have airworthiness inspection division (AID) duties been delegated to: 1. other CAA divisions <input type="checkbox"/> Yes <input type="checkbox"/> No 2. other State bodies <input type="checkbox"/> Yes <input type="checkbox"/> No 3. regional organization <input type="checkbox"/> Yes <input type="checkbox"/> No 4. private agencies <input type="checkbox"/> Yes <input type="checkbox"/> No 5. designated inspectors <input type="checkbox"/> Yes <input type="checkbox"/> No			

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
GM Doc 9389 2.2.3	AIR 5.029 If yes to 1), 2) 3) 4) or 5), what is the relationship with the AID?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 2.2.3	AIR 5.030 If yes to 1), 2), 3) 4) or 5), how does the AID ensure control and oversight?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 2.2.3	AIR 5.031 If yes to 5), what are the requirements and procedures for designation?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc. 9389 2.2 & 4.4	AIR 5.032 How many airworthiness inspectors are there?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 2.1.3	AIR 5.033 Do the airworthiness regulations provide for right of inspection?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 2.1.3	AIR 5.034 Do airworthiness inspectors have a credential to inspect aircraft and facilities?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9734 3.5	AIR 5.035 Is there a formal handbook for the use and guidance of members of the airworthiness inspection division?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	

ICAO ref.	Aspects to be audited or questions to be answered	Status	Implementation as applicable	Comments
	<p>AIR 5.036 Does this handbook provide guidance for airworthiness staff to carry out their duties:</p> <p>1. C of A issuance <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>2. C of A renewal <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>3. issuance of flight permits <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>4. approval of maintenance programme <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>5. operator maintenance control manual <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>6. AMO maintenance procedures manual <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>7. operator audit procedures <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>8. AMO audit procedures <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>9. ramp checks <input type="checkbox"/> Yes <input type="checkbox"/> No</p>		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
	<p>AIR 5.037 Do airworthiness inspectors use checklists during:</p> <p>1. C of A issue/renewal <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>2. aircraft ramp inspection <input type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>3. maintenance facility inspection <input type="checkbox"/> Yes <input type="checkbox"/> No</p>		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 4.4	AIR 5.038 Are there minimum qualifications/experience for airworthiness inspectors?	<input type="checkbox"/> Yes <input type="checkbox"/> No	<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited	
GM Doc 9389 4.4	AIR 5.039 If yes, what are the minimum qualifications required?		<input type="checkbox"/> Satisfactory <input type="checkbox"/> Not satisfactory <input type="checkbox"/> Not implemented <input type="checkbox"/> Not applicable <input type="checkbox"/> Not audited

Appendix A

Safety Oversight Audit Section (SOA) — Organizational Structure

Appendix B

Sample Memorandum of Understanding (MOU)

Memorandum of Understanding (MOU) between State [long name] and the International Civil Aviation Organization (ICAO) Regarding Safety Oversight Audit

Whereas the 32nd Assembly of ICAO in Assembly Resolution A32-11 directed the Council to establish the ICAO Universal Safety Oversight Audit Programme, providing for regular, mandatory, systematic and harmonized safety audits to be carried out by ICAO, that such universal safety oversight programme shall apply to all Contracting States, and that greater transparency and increased disclosure be implemented in the release of audit results;

Whereas the 32nd Assembly urged all Contracting States to agree to audits to be carried out upon ICAO's initiative, but always with the consent of the State to be audited, by signing a bilateral Memorandum of Understanding with the Organization;

IT IS AGREED AS FOLLOWS:

. In accordance with Assembly Resolution A32-11, State [long name], hereafter referred to as State [abbreviated name], hereby agrees to the conduct of a safety oversight audit by an ICAO safety oversight audit team, on the dates established by ICAO as published in its yearly schedule of audits, unless justified reasons lead the parties to mutually agree on other dates.

. No change in the annual schedule of audits will be allowed within sixty calendar days prior to the starting date of the audit of the State, except for a compelling reason, which must be submitted to the President of the ICAO Council for his consideration.

. The ICAO Regional Office accredited to State [abbreviated name] will be actively involved in the safety oversight audit process.

. The safety oversight audit team will be comprised of experts in the fields of personnel licensing, flight operations, airworthiness or any other related discipline that might be required for the audit. The composition of the team (names and qualifications) will be provided to the civil aviation administration of the State prior to the safety oversight audit.

. The team members will have command of one of the ICAO languages and good working knowledge of English. At least one of the team members will have command of the ICAO language chosen by the State. State [abbreviated name] will be informed of the other specific language capabilities of each team member prior to the audit.

. State [abbreviated name] agrees to facilitate the audit by making appropriate staff from its Civil Aviation Authority (or any relevant entity responsible for safety regulation), locally based commercial air transport operators and aerodrome facilities, available for interview by the safety oversight audit team. State [abbreviated name] will be required to take the necessary measures to facilitate the work of the safety oversight audit team, including interpretation services, local transportation, interviews, paperwork, etc. State [abbreviated name] will also arrange and meet the cost of transportation and accommodation when visits are required outside the main administrative office.

. The safety oversight audit team will review State [abbreviated name] compliance with the Standards and Recommended Practices (SARPs) set out in Annexes 1, 6 and 8, as well as with related procedures, and adherence to guidance material and relevant safety-related practices in general use in the aviation industry, as referred to in such material. The safety oversight audit team will also review whether State [abbreviated name] has the organizational structure with the legal status necessary to carry out its safety oversight responsibilities. State [abbreviated name] agrees to make all relevant documents, files and information available to the safety oversight audit team.

. The safety oversight audit team will review the State's regulatory provisions, examine records and documentation and conduct interviews, in order to make its findings and recommendations, on the basis of safety oversight audit general requirements, as follows:

B-1

- a) consideration of existing national legislation enabling States to enforce the provisions of the Convention on International Civil Aviation;
- b) consideration of existing national regulations enabling States to carry out detailed safety regulation in support of the Convention on International Civil Aviation and Annexes 1, 6 and 8 thereto and related provisions in other Annexes, as well as associated ICAO procedures, guidance material and relevant safety-related practices in general use in the aviation industry as referred to in such material;
- c) a system for both the certification and the continued surveillance of personnel, aircraft and operators, to ensure that the relevant SARPs are maintained, in particular with respect to:
 - i) qualified airworthiness and flight operations inspectors and licensing personnel supported by an appropriate organizational and managerial structure;
 - ii) detailed records of training given to airworthiness inspectors, flight operations inspectors and licensing personnel;
 - iii) policy on the safety regulation of maintenance, flight operations and licensing;
 - iv) availability of appropriate reference material, including ICAO documentation;
 - v) information on which ICAO SARPs have been used for approval of air operator certificate (AOC) holders or maintenance organizations;
 - vi) inspection results containing details of technical and operational deficiencies;
 - vii) evidence of compliance with airworthiness directives (ADs) and of adherence to approved maintenance programmes;
 - viii) evidence of procedures for the issuance, approval, suspension and revocation of licences, AOCs and Certificates of Airworthiness (CofAs) when unsafe conditions are identified and records of how often action has been taken;
 - ix) evidence that major modifications to aircraft have been properly approved and that relevant information has been duly transmitted to the State of registry, the State of manufacture and the State of design, as applicable; and
 - x) evidence of overall system safety awareness and of a mechanism for accident prevention; and
- d) implementation of ICAO SARPs and procedures, as well as adherence to guidance material and relevant safety-related practices in general use in the aviation industry as referred to in such material, related to the certification and supervision of the operator, in particular with respect to the requirements of an adequate organization, method of control and supervision of flight operations, training programmes and maintenance arrangements consistent with the nature and extent of the operations specified.

State [abbreviated name] agrees to make all relevant documents, files and information available to the safety oversight audit team.

9. On the last day of the safety oversight audit, the ICAO safety oversight audit team will give a detailed debriefing on the audit results to government officials as well as senior management and other higher officials, as applicable, of the Civil Aviation Authority (CAA) of the State, including an explanation of subsequent activities in the audit process. Before departing the State, the audit team will also provide the CAA with a list of preliminary findings and recommendations, and with general guidelines for the preparation of an action plan, so that the State may be in a position to begin work immediately on its action plan.

10. Upon completion of the safety oversight audit, ICAO undertakes to make available to State [abbreviated name] a confidential interim report within thirty calendar days after the last day of the audit, if no translation of the report into another ICAO language is required. If such a translation is required, a translated copy will be made available within an additional thirty working days. The confidential interim report will detail:

- a) findings on the general requirements specified in paragraph 8 above;
- b) differences which exist between national regulations and practices of State [abbreviated name] and ICAO SARPs;
- c) lack of implementation or non-compliance with ICAO SARPs and related procedures;
- d) adherence to guidance material and relevant safety-related practices in general use in the aviation industry, as referred to in such material; and
- e) recommendations of the ICAO safety oversight audit team for immediate remedial action.

11. Should action be necessary to remedy deficiencies, State [abbreviated name] undertakes to start working on the preparation of an appropriate action plan immediately after State [abbreviated name] has been debriefed on the audit and provided with a list of findings and recommendations by the safety oversight audit team, as described in paragraph 9 above. Feedback on the development of the action plan by State [abbreviated name] will be provided by ICAO at the request of the State during the preparation period.

12. Should action be necessary to remedy deficiencies, State [abbreviated name] undertakes to provide, within thirty calendar days from the date the interim report has been made available to the State, an action plan acceptable to the ICAO Secretary General. The action plan should address the findings and recommendations of the safety oversight audit team, providing specific actions and deadlines for the correction of the deficiencies identified during the safety oversight audit. If the interim report requires translation, the time line for the production of an action plan starts when the State receives the translated interim report. All subsequent actions will be sequenced accordingly.

13. Within thirty calendar days after State [abbreviated name] has submitted an action plan, officials from the ICAO accredited Regional Office may conduct a preliminary review to determine the progress made by State [abbreviated name] towards activation of the action plan. If no action plan has been submitted, the ICAO accredited Regional Office will contact State [abbreviated name] to determine why an action plan has not been submitted.

14. After the preliminary review has been conducted by the ICAO accredited Regional Office, a confidential final report will be completed by ICAO and made available to State [abbreviated name] within thirty calendar days if no translation of the report into another ICAO language is required, or within an additional thirty working days if such translation is required.

15. In addition to the information contained in the interim report, as detailed in paragraph 10 above, the final report will include a comprehensive analysis by ICAO of the action plan submitted by State [abbreviated name], as well as information on the progress made by State [abbreviated name] on the implementation of the action plan and on any remedied deficiencies and outstanding differences to ICAO SARPs. If no acceptable action plan is provided in accordance with paragraph 12 above, ICAO will issue the confidential final safety oversight audit report. This report will contain the deficiencies identified during the audit, the status of implementation and/or differences from ICAO SARPs and procedures, as well as adherence by State [abbreviated name] to guidance material and relevant safety-related practices in general use in the aviation industry, as referred to in such material. Mention will also be made of the failure of the State to submit an action plan to ICAO.

16. Safety oversight interim and final reports will be confidential and made available to State [abbreviated name] and the accredited ICAO Regional Office only. Concurrently with the preparation of the final report, a non-confidential summary report containing an abstract of the overall findings and recommendations of the safety oversight audit team, of the actions proposed by State [abbreviated name] to remedy the identified deficiencies, if any, and of the progress made on the implementation of the action plan will be provided to the State. State [abbreviated name] will be given twenty-one calendar days to provide its comments on the final and the summary reports, after which the summary report will be made available to other Contracting States.

17. The obligations and responsibilities for notifying to ICAO any difference or non-compliance with Standards contained in any ICAO Annex shall rest with State [abbreviated name]. Differences which exist between the national regulations and practices of State [abbreviated name] and ICAO Standards, which have been identified during the course of the safety oversight audit, and which will continue to exist when the final report is issued, shall be deemed to have been notified to ICAO by State [abbreviated name]. ICAO will incorporate these differences in the Supplements to the appropriate Annexes and in any other relevant ICAO safety-related publication.

19. If requested by State [abbreviated name], direct assistance may be provided by ICAO through its Technical Co-operation Bureau (TCB) in the development of a document which may serve as an action plan as referred to in paragraphs 11 and 12 of this MOU. This document would include all necessary details on time frame, costing, as well as personnel and training requirements as a basis for seeking funding from donor organizations and/or financial institutions for the implementation of a safety oversight improvement project. This document would need to be funded by State [abbreviated name], on a cost recovery basis, and would be completed within the time limits specified in paragraph 12 above.

Appendix C

Reporting Forms

A reporting form should be completed for each audit finding (see Chapter 5, Section 5.11). The following pages contain examples of the forms used to report findings and recommendations in the areas of:

- Primary aviation legislation and civil aviation regulations;
- Civil aviation organization system;
- Personnel licensing and training;
- Aircraft operations certification and supervision; and
- Airworthiness of aircraft.

APPENDIX 1 TO THE AUDIT INTERIM REPORT

FINDINGS AND RECOMMENDATIONS RELATING TO
PRIMARY AVIATION LEGISLATION AND CIVIL AVIATION REGULATIONS

State: [Name of State] Audit period: [Date of audit]	Finding and Recommendation Number LEG / XX
Document reference: [references]	Audit protocol reference: LEG -X.XXX
Type of finding: <input type="checkbox"/> Non-compliance with Chicago Convention or State Regulations <input type="checkbox"/> Non-conformance with Annex Standards <input type="checkbox"/> Non-adherence to Annex Recommended Practices <input type="checkbox"/> Non-adherence to guidance material <input type="checkbox"/> Non-adherence to relevant safety related practices

Appendix D

Reporting Forms on the Status of Implementation or Differences to SARPs

A reporting form should be completed concerning the status of implementation and differences to SARPs. (See Chapter 6, Section 6.1.1). The following pages contain examples of the form used to report the status of implementation and differences to SARPs in the following areas:

Annex 1 - Personnel licensing

Annex 6 - Operation of aircraft

Annex 8 - Airworthiness of aircraft

(ANNEX 1 — PERSONNEL LICENSING)

[illegible]

STATUS OF DIFFERENCES TO ICAO STANDARDS

(ANNEX 6 — OPERATION OF AIRCRAFT)

[illegible]

(PART I — International Commercial Air Transport - Aeroplane)

[illegible]

—

|||

I

APPENDIX 7-B3 TO THE AUDIT INTERIM REPORT

STATUS OF DIFFERENCES TO ICAO RECOMMENDED PRACTICES

(ANNEX 6 — OPERATION OF AIRCRAFT)
(PART III — International Operations - Helicopter)

Note: — The Chicago Convention requires that a Contracting State file differences existing between its regulations and ICAO Annex Standards. However, due to the specific mandate given to ICAO for the implementation of the ICAO universal safety oversight audit programme, it is necessary to include differences existing between the national regulations and ICAO Annex Recommendations, including Annex definitions, to encourage implementation and for inclusion in the summary report. Differences with Annex Recommended Practices will not be included in the Supplement to the relevant Annex if they should remain unimplemented by the time the final report is published.

[illegible]

APPENDIX 7-C TO THE AUDIT INTERIM REPORT

STATUS OF DIFFERENCES TO ICAO RECOMMENDED PRACTICES

(ANNEX 8 — AIRWORTHINESS OF AIRCRAFT)

Note: — The Chicago Convention requires that a Contracting State file differences existing between its regulations and ICAO Annex Standards. However, due to the specific mandate given to ICAO for the implementation of the ICAO universal safety oversight audit programme, it is necessary to include differences existing between the national regulations and ICAO Annex Recommendations, including Annex definitions, to encourage implementation and for inclusion in the summary report. Differences with Annex Recommended Practices will not be included in the Supplement to the relevant Annex if they should remain unimplemented by the time the final report is published.

Audit Follow-up Observation/Recommendation Form

An audit follow-up observation/recommendation form should be completed for each audit follow-up observation/recommendation related to safety concerns (see Chapter 6A, Section 6A.1.2). Overleaf is a sample form used to report observations and recommendations.

FORM G-1

AUDIT FOLLOW-UP OBSERVATIONS/RECOMMENDATIONS

State: [Name of State]	Audit follow-up period: [Dates of the audit follow-up]
<p>General Note.— If, incidental to the follow-up mission, the audit follow-up team has significant concerns about safety issues in relation to the State's conformance with or adherence to SARP's, procedures, guidance material, or good aviation safety practices, it will record those concerns as "observations" requiring corrective action by the audited State. Such observations, together with recommendations for corrective action, will be recorded on Form G-1. The observations will be included in a separate section of the audit follow-up report, and the audited State will be encouraged to submit a corrective action plan. Observations will not be included in the non-confidential audit follow-up summary report.</p>

— END —

ICAO TECHNICAL PUBLICATIONS

The following summary gives the status, and also describes in general terms the contents of the various series of technical publications issued by the International Civil Aviation Organization. It does not include specialized publications that do not fall specifically within one of the series, such as the Aeronautical Chart Catalogue or the Meteorological Tables for International Air Navigation.

International Standards and Recommended Practices are adopted by the Council in accordance with Articles 54, 37 and 90 of the Convention on International Civil Aviation and are designated, for convenience, as Annexes to the Convention. The uniform application by Contracting States of the specifications contained in the International Standards is recognized as necessary for the safety or regularity of international air navigation while the uniform application of the specifications in the Recommended Practices is regarded as desirable in the interest of safety, regularity or efficiency of international air navigation. Knowledge of any differences between the national regulations or practices of a State and those established by an International Standard is essential to the safety or regularity of international air navigation. In the event of non-compliance with an International Standard, a State has, in fact, an obligation, under Article 38 of the Convention, to notify the Council of any differences. Knowledge of differences from Recommended Practices may also be important for the safety of air navigation and, although the Convention does not impose any obligation with regard thereto, the Council has invited Contracting States to notify such differences in addition to those relating to International Standards.

Procedures for Air Navigation Services (PANS) are approved by the Council for worldwide application. They contain, for the most part, operating procedures regarded as not yet having attained a sufficient degree of

maturity for adoption as International Standards and Recommended Practices, as well as material of a more permanent character which is considered too detailed for incorporation in an Annex, or is susceptible to frequent amendment, for which the processes of the Convention would be too cumbersome.

Regional Supplementary Procedures (SUPPS) have a status similar to that of PANS in that they are approved by the Council, but only for application in the respective regions. They are prepared in consolidated form, since certain of the procedures apply to overlapping regions or are common to two or more regions.

The following publications are prepared by authority of the Secretary General in accordance with the principles and policies approved by the Council.

Technical Manuals provide guidance and information in amplification of the International Standards, Recommended Practices and PANS, the implementation of which they are designed to facilitate.

Air Navigation Plans detail requirements for facilities and services for international air navigation in the respective ICAO Air Navigation Regions. They are prepared on the authority of the Secretary General on the basis of recommendations of regional air navigation meetings and of the Council action thereon. The plans are amended periodically to reflect changes in requirements and in the status of implementation of the recommended facilities and services.

ICAO Circulars make available specialized information of interest to Contracting States. This includes studies on technical subjects.
